**QUESTION** I have a 1994 Ford Taurus with 100,000 miles. The car has been running fine for the last 10 years. Recently, the car has been running rough and the engine is shaking. The car is also making a knocking sound. What could be the problem?

**ANSWER** The most likely cause of the engine shaking and knocking sound is a bad spark plug. The spark plug is responsible for igniting the fuel in the combustion chamber. If the spark plug is bad, the fuel will not ignite properly, causing the engine to shake and knock. You should check the spark plug and replace it if it is bad. The other possible causes of the engine shaking and knocking sound are a bad timing belt, a bad water pump, or a bad oil pump. You should check these components and replace them if they are bad.
