Transforming Campus Networks to Intent-Based Networking Pieter-Jan Nefkens,2019-12-05 Migrate to Intent Based Networking and improve network manageability cost agility security and simplicity With Intent Based Networking IBN you can create networks that capture and automatically activate business intent assure that your network responds properly proactively detect and contain security threats and remedy network issues before users even notice Intent Based Networking makes networks far more valuable but few organizations have the luxury of building them from the ground up In this book leading expert Pieter Jans Nefkens presents a unique four phase approach to preparing and transforming campus network infrastructures architectures and organization helping you gain maximum value from IBN with minimum disruption and cost The author reviews the problems IBN is intended to solve and illuminates its technical business and cultural implications Drawing on his pioneering experience he makes specific recommendations identifies pitfalls and shows how to overcome them You ll learn how to implement IBN with the Cisco Digital Network Architecture and DNA Center and walk through real world use cases In a practical appendix Nefkens even offers detailed technical configurations to jumpstart your own transformation Review classic campus network deployments and understand why they need to change Learn how Cisco Digital Network Architecture DNA provides a solid foundation for state of the art next generation network infrastructures Understand intent and how it can be applied to network infrastructure Explore tools for enabling automating and assuring Intent Based Networking within campus networks Transform to Intent Based Networking using a four phased approach Identify challenges Prepare for Intent Design and Deploy and Enable Intent Anticipate how Intent Based Networking will change your enterprise architecture IT operations and business *The Consumer Response to Gasoline Price Changes* Kenneth Thomas Gillingham,2011 When gasoline prices rise people notice the news is filled with reports of pinched household budgets and politicians feeling pressure to do something to ameliorate the burden Yet raising the gasoline tax to internalize externalities is widely considered by economists to be among the most economic efficiency improving policies we could implement in the transportation sector This dissertation brings new evidence to bear on quantifying the responsiveness to changing gasoline prices both on the intensive margin i e how much to drive and the extensive margin i e what vehicles to buy I assemble a unique and extremely rich vehicle level dataset that includes all new vehicle registrations in California 2001 to 2009 and all of the mandatory smog check program odometer readings for 2002 to 2009 The full dataset exceeds 49 million observations Using this dataset I quantify the responsiveness to gasoline price changes on both margins as well as the heterogeneity in the responsiveness I develop a novel structural model of vehicle choice and subsequent utilization where consumer decisions are modeled in a dynamic setting that explicitly accounts for selection on unobserved driving preference

at both the time of purchase and the time of driving This utility consistent model allows for the analysis of the welfare implications to consumers and government of a variety of different policies including gasoline taxes and feebates I find that consumers are responsive to changing gasoline prices in both vehicle choice and driving decisions with more responsiveness than in many recent studies in the literature I estimate a medium run i e roughly two year elasticity of fuel economy with respect to the price of gasoline for new vehicles around 0.1 for California a response that varies by whether the vehicle manufacturer faces a tightly binding fuel economy standard I estimate a medium run elasticity of driving with respect to the price of gasoline around 0.15 for new personal vehicles in the first six years Older vehicles are driven much less but tend to be more responsive with an elasticity of roughly 0.3 I find that the vehicle level responsiveness in driving to gasoline price changes varies by vehicle class income geographic and demographic groups I also find that not including controls for economic conditions and not accounting for selection into different types of new vehicles based on unobserved driving preference tend to bias the elasticity of driving away from zero implying a greater responsiveness than the true responsiveness This is an important methodological point for much of the literature estimating similar elasticities ignores these two issues These results have significant policy implications for policies to reduce gasoline consumption and greenhouse gas emissions from transportation The relatively inelastic estimated responsiveness on both margins suggests that a gasoline tax policy may not lead to dramatic reductions in carbon dioxide emissions but is a relatively non distortionary policy instrument to raise revenue When the externalities of driving are considered an increased gasoline tax may not only be relatively non distortionary but even economic efficiency improving However I find that the welfare changes from an increased gasoline tax vary significantly across counties in California an important consideration for the political feasibility of the policy Finally I find suggestive evidence that the rebound effect of a policy that works only on the extensive margin such as a feebate or CAFE standards may be closer to zero than the elasticity of driving with respect to the price of gasoline This suggestive finding is particularly important for the analysis of the welfare effects of any policy that focuses entirely on the extensive margin

The Volvo Estate Ashley Hollebhone,2022 This book chronicles the history of the world's most iconic estate car station wagon with a wonderful variety of images some

of which have never been published before The first Volvo car went on sale in 1927 and this book tells the story of the much loved estate right up to the V90 *Gathered Here Together* Garrett Socol,2011-12-05 Gathered here together are 22 of Garret Socol s finely crafted stories by turns darkly humorous and light and zany and often both at once The characters populating these stories march slightly out of step with the world around them a housewife who finds her art and revives a faded marriage in the laundry room a writer who publishes her own suicide handbook a woman selling baked goods for electroshock therapy In this collection Socol brings his wry insight and sensitivity to bear on the madness of contemporary culture the silliness of everyday life and illustrates the many ways people against all odds keep themselves afloat **Before the Poison** Peter Robinson,2011-10-04 From bestselling author Peter Robinson comes this atmospheric suspenseful and thrilling standalone novel Through the years of success in Hollywood composing film scores Chris always promised his wife they d return to the Yorkshire Dales one day Now a widower Chris feels he must not forget his promise Back in the Dales he rents an isolated house that will allow him the space to grieve and the peace to compose his piano sonata But when he finds that the house was the scene of a murder in the 1950s and the convicted murderer was one of the last women hanged in England he finds himself increasingly distracted by the events of sixty years before *European Car* ,2007 *Urban Transport XVIII* James W. S. Longhurst,C. A. Brebbia,2012 This book contains the proceedings of the Eighteenth International Conference on on Urban Transport and the Environment held in A Coru a Spain May 14 16 2012 The papers presented at the conference cover topics such as Urban Transport Planning and Management Transportation Demand Analysis Traffic Integration and Control Intelligent Transport Systems Transport Modelling and Simulation Land Use and Transport Integration Public Transportation Systems Environmental and Ecological Aspects Air and Noise Pollution Safety and Security Energy and Transport Fuels Economic and Social Impact and Advanced Transport Systems **Torque** ,2006-09 Singapore s best homegrown car magazine with an editorial dream team driving it We fuel the need for speed **The Finder** Alex Woolf,2014-05-27 Introducing Waldo Mars former model failed inventor and the best finder east of Alpha Centauri or at least Uxbridge Waldo is impeded rebuked and generally resented at every turn by his put upon assistant Rose Duvalle And if he isn t fighting with Rose he is having to indulge the delusions of his bizarre clientele There s Reg for example who s mislaid his Tuesday And Tom who s mislaid himself And Gerald who s lost a little patch of his study just a small cube shaped area right in the middle Where do these people come from and what Waldo wouldn t give for a straightforward case from time to time An amusing intriguing and surreal set of mystery stories about a finder who frequently feels a little lost
