Uses Of Values In Legal Education:

Uses of Values in Legal Education Graham Ferris, 2014 Values both constrain and enable behaviour They are a vital source of meaning in human life They may be unconsciously inherited or consciously reflected upon The challenge is to take the greatest advantage of value informed teaching and learning in the context of a pluralist education and society The values legal education imparts or generates impact upon the character of legal professionals The work of jurists impacts upon the quality of public discourse Legal education is under severe threat after a period of tremendous growth across the common law world Legal markets are unstable information technology drives specialisation of labour to new levels rising costs for students and falling returns to the human capital generated by legal education make the prospect of a legal education less enticing Enhanced engagement with values offers the best hope for a positive and coherent response to these pressures by legal educators The Uses of Values in Legal Education makes a start by showing how using values in legal education might fulfil the promise of legal education Incorporation of values into legal teaching and reflection upon values as an integral part of the student learning experience can facilitate the formation of robust and effective individual student identities When this leads to an alignment of student values with life plans it can generate a sense of wholeheartedness in activity that enriches life Students with clear and considered ethical ideas can become effective ethical agents beyond the educational setting This is a must read for anyone designing law curricula He sources his arguments from the fields of literature business economics politics education psychology law and philosophy and he provides both theoretical and practical examples and perspectives This is an important book It is not an easy read the ideas are complex and the range of source material impressive but once the premise is accepted that we have an ethical responsibility to design legal education in the best interests of the law student it is a game changer Rebecca Huxley Binns in The Law Teacher 2016 411 Graham Ferris makes a clear and compelling case for why legal education should fully embrace values He explores how values can be incorporated and taught in the law degree curriculum in order to enhance the welfare and capabilities of law students and restores the link between ethical judgment and professional practice His book mak

AI and Legal Education Anil Balan, 2025-02-04 This book provides a comprehensive interdisciplinary analysis of the sustainable and ethical integration of artificial intelligence AI within legal education offering practical strategies for balancing innovation with ethical responsibility Discussing the intersection of legal studies technology and ethics the book focuses on AI s role in reshaping professional education With the rising demand for digital transformation in legal education and the increasing scrutiny of AI s ethical impact this book explores the potential of AI to enhance legal learning and practice while critically examining the challenges of data privacy algorithmic bias and equitable access to technology Outlining a framework for incorporating AI into the law curriculum the book equips the readers with both cutting edge technological skills and a deep understanding of AI s ethical and societal implications Drawing on a wide range of sources including industry data and academic research the book offers grounded

actionable guidance on implementing AI in a way that promotes inclusivity sustainability and long term relevance It addresses the needs of legal education institutions faculty and students providing them with the tools to navigate the evolving legal landscape while maintaining ethical standards The book will also be of interest to researchers in the fields of law education and AI ethics Social Justice and Legal Education Chris Ashford,Paul McKeown,2019-01-15 Recent years have seen social justice emerge as a powerful driver for work both in law schools and the legal services sector However questions remain about how that term is understood and given meaning within the legal academy and beyond This edited collection explores the meanings that have emerged and might subsequently be developed together with a practical exploration of projects that have sought to bring the social justice agenda to life in law schools and in communities around the world Over the course of eighteen chapters this volume engages with a range of social justice and legal education themes including clinical legal education innocence projects access to justice cause lawyering LGBTQ identities and sustainability in law schools In addition it also explores themes of ethics and values in contemporary legal education in Africa Australia North America and the UK *The Ethics Project in Legal Education* Michael Robertson,Lillian Corbin,Kieran Tranter,Francesca Bartlett,2010-10-06 The contributions in this volume suggest that the ethics project in legal education is increasingly an international one Even though the strength of commitment by both the profession and the legal academy to ethics learning within law schools varies two fundamental questions confront all who work in this area First what is it that we want our students to learn or perhaps in what manner do we want our students to develop from the teaching of legal ethics Second how can we create a learning environment that will encourage the nature and quality of learning we think is important All the contributors to this volume take a strong stand on the importance of ethical legal practice and the role of law schools in developing students capacities in this area They share a belief in the essential need to encourage law students to engage with the moral dimensions of legal practice The questions that these scholars grapple with are therefore not of the should we be teaching this variety but how might we best to go about doing this so that our efforts within law schools really make some difference Each of the chapters in this volume adds uniquely to our understanding of these matters *Transforming Legal Education* Paul Maharg,2016-12-05 Paul Maharg presents a critical inquiry into the identity and possibilities of legal education and an exploration of transformational alternatives to our current theories and practices of teaching and learning the law His work takes the view that bodies of interdisciplinary theory and knowledge of the history of legal education are important to all stages of legal education He also argues that new learning designs such as transactional learning need to be developed to help students educators and lawyers deal with the transitions and challenges facing them now and in the foreseeable future Throughout discussions of theory are spliced with case studies of academic and professional legal learning particularly in the field of technology enhanced learning The content of the book will be updated in a community of practice wiki at <http://www.transforming.org.uk> which will also allow readers to comment and expand on the book's final chapter

Vulnerability and the Organisation of Academic Labour Graham Ferris, Martha Albertson Fineman, 2024-09-20

Vulnerability theory identifies structural and institutional factors that build or undermine the resilience of individuals and organisations. This volume uses vulnerability theory to explore how the organisation of the teaching and research activities of universities impact the resilience of academics and also how these activities themselves are impacted by contemporary developments in universities and educational policy. The starting point of enquiry is that neither academics nor universities are invulnerable and that urgent attention is needed to reverse developments that undermine their resilience. The contributions focus on universities in the US and UK legal education in the UK criminal justice in the UK Brazilian legal education research in deprived communities and the ethics of medical professionals. This broad range of subjects is connected by use of vulnerability theory to interrogate academic practices and universities as organisations which should build resilience in their workforce and communities and in so doing secure their own resilience but which far too often fail to do so and actually undermine resilience. It is argued this is not due to malefic intentions but to institutional features of the sector and society. Of immediate interest to anyone who works in studies at or relies upon the research mission of universities and to those involved in the management of universities this book will also be relevant to policy analysts and policymakers who will find value in the reframing of vital issues in higher education policy by vulnerability theory allowing a more realistic and productive policy environment to develop. This book was originally published as a special issue of *The Law Teacher*.

Legal Education in a Changing World International Legal Center. Committee on Legal Education in the Developing Countries, 1975 **Legal Education** Caroline Strevens, Richard Grimes, Edward Phillips, 2016-04-22 The importance of simulation in education specifically in legal subjects is here discussed and explored within this innovative collection. Demonstrating how simulation can be constructed and developed for learning teaching and assessment the text argues that simulation is a pedagogically valuable and practical tool in teaching the modern law curriculum. With contributions from law teachers within the UK Australia Hong Kong South Africa and the USA the authors draw on their experiences in teaching law in the areas of clinical legal education legal process evidence criminal law family law and employment law as well as teaching law to non law students. They claim that simulation as a form of experiential and problem based learning enables students to integrate the classroom experience with the real world experiences they will encounter in their professional lives. This book will be of relevance not only to law teachers but university teachers generally as well as those interested in legal education and the theory of law *Values in Professional Practice* Stephen Pattison, Roisin Pill, 2004 Chapters include breastfeeding and human milk formula feeding preterm and low birthweight babies weaning vegetarian and other restricted types of diet vitamins gastrointestinal disorders non enteric disorders topical nutritional issues from table of contents **Teaching Legal Education in the Digital Age** Ann Thanaraj, Kris Gledhill, 2022-10-14 Teaching Legal Education in the Digital Age explores how legal pedagogy and curriculum design should be modernised to ensure that law students have a realistic view

of the future of the legal profession Using future readiness and digital empowerment as central themes chapters discuss the use of technology to enhance the design and delivery of the curriculum and argue the need for the curriculum to be developed to prepare students for the use of technology in the workplace The volume draws together a range of contributions to consider the impact of digital pedagogies in legal education and propose how technology can be used in the law curriculum to enhance student learning in law schools and lead excellence in teaching Throughout the authors consider what it means to be future ready and what we can do as law academics to facilitate the knowledge skills and dispositions needed by future ready graduates Part of Routledge s series on Legal Pedagogy this book will be of great interest to academics post graduate students teachers and researchers of law as well as those with a wider interest in legal pedagogy or legal practice
