Remembering the Holocaust in a Racial State Roni Mikel-Arieli, 2022-07-18 The lens of apartheid era Jewish commemorations of the Holocaust in South Africa reveals the fascinating transformation of a diasporic community Through the prism of Holocaust memory this book examines South African Jewry and its ambivalent position as a minority within the privileged white minority Grounded in research in over a dozen archives the book provides a rich empirical account of the centrality of Holocaust memorialization to the community's ongoing struggle against global and local antisemitism Most of the chapters focus on white perceptions of the Holocaust and reveals the tensions between the white communities in the country regarding the place of collective memories of suffering in the public arena However the book also moves beyond an insular focus on the South African Jewish community and in very different modality investigates prominent figures in the anti apartheid struggle and the role of Holocaust memory in their fascinating journeys towards freedom

Encyclopedia of African Colonial Conflicts Timothy J. Stapleton, 2016-11-07 Two volumes introduce the history of colonial wars in Africa and illustrate why African countries like the Democratic Republic of Congo Nigeria Somalia and Sudan continue to experience ethnic political and religious violence in the early 21st century This sweeping study examines the wars of colonial conquest fought in Africa during the 19th and early 20th centuries From Britain's efforts to wrest control of the Sudan from military leader Muhammad Ahmad al Mahdi to Italy's decisive defeat at the Battle of Adowa in Ethiopia to Leopold II's brutal reign over the Belgian Congo the work surveys the devastation reaped upon the continent by colonization and illustrates how its combative influence continues to resonate in Africa today Written by scholars in the fields of history and politics this complete reference includes entries on wars campaigns rebellions battles leaders and organizations The work delves into key historical periods including the Scramble for Africa ca 1880 to 1910 early European colonial wars in Africa such as the Dutch in the Cape and the Portuguese in Angola and Mozambique and African rebellions against the early colonial state in the 1890s and early 1900s Entries feature prominent events and personalities as well as lesser known occurrences and players

Negotiating Quality Concerns in Higher Education amidst Disruptions Felix Maringe, Otilia Chiramba, 2025-06-02 Quality is at the heart of organisational development It is the one single reason organisations make progress or fail dismally when it is absent Disruptions can both be a catalyst for innovation and progress on one hand but when they are not well handled they can cause organisations to spiral into catastrophe and oblivion This book is about how best to safeguard quality both during and beyond disruptions Based largely on research in South Africa the collection of essays will resonate with multiple higher education contexts and audiences Collectively the essays provide compelling reading for practitioners academics researchers and policy makers in higher education The book's central message is that while disruptions can expose our organisational weaknesses they create several opportunities to drive change and transformation The essays here capture the transition from crisis to high performance and ways in which

universities can navigate such journeys

Entropy Applications in Environmental and Water Engineering Huijuan Cui, Bellie Sivakumar, Vijay P. Singh, 2019-03-07 Entropy theory has wide applications to a range of problems in the fields of environmental and water engineering including river hydraulic geometry fluvial hydraulics water monitoring network design river flow forecasting floods and droughts river network analysis infiltration soil moisture sediment transport surface water and groundwater quality modeling ecosystems modeling water distribution networks environmental and water resources management and parameter estimation Such applications have used several different entropy formulations such as Shannon Tsallis R nyi Burg Kolmogorov Kapur configurational and relative entropies which can be derived in time space or frequency domains More recently entropy based concepts have been coupled with other theories including copula and wavelets to study various issues associated with environmental and water resources systems Recent studies indicate the enormous scope and potential of entropy theory in advancing research in the fields of environmental and water engineering including establishing and explaining physical connections between theory and reality The objective of this Special Issue is to provide a platform for compiling important recent and current research on the applications of entropy theory in environmental and water engineering The contributions to this Special Issue have addressed many aspects associated with entropy theory applications and have shown the enormous scope and potential of entropy theory in advancing research in the fields of environmental and water engineering

Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated

approach to leadership development within their critical bridging roles between the academe and administration The History of Geophysics in Southern Africa Johan de Beer, 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488 This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country s proud history The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict **Corrupted** takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
