Marumo, Zahraa McDonald, Nicholus T. Mollo, Louis J. Oosthuizen, Ferdinand J. Potgieter, Bianke van Rooyen, Marius H. Smit, Amos T. Thebenyane, Andre van der Bijl, Johannes (Hannes) L. van der Walt, 2019-12-12 This book is a collection of chapters based on original research dealing with issues of discipline and disciplinary practices in educational institutions The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings The issue of discipline is investigated from diverse paradigmatic and methodological perspectives presenting empirical as well as also philosophical research The empirical perspective includes quantitative positivistic qualitative interpretive and mixed methods pragmatic designs and worldviews This book offers a ground breaking contribution to the field of learner and student discipline with insights into disciplinary practices and issues in educational institutions not hitherto researched such as Technical Vocational Education and Training colleges and universities *Ecological Informatics* Friedrich Recknagel, William K. Michener, 2017-09-21 This book introduces readers to ecological informatics as an emerging discipline that takes into account the data intensive nature of ecology the valuable information to be found in ecological data and the need to communicate results and inform decisions including those related to research conservation and resource management At its core ecological informatics combines developments in information technology and ecological theory with applications that facilitate ecological research and the dissemination of results to scientists and the public Its conceptual framework links ecological entities genomes organisms populations communities ecosystems landscapes with data management analysis and synthesis and communicates new findings to inform decisions by following the course of a loop In comparison to the 2nd edition published in 2006 the 3rd edition of *Ecological Informatics* has been completely restructured on the basis of the generic conceptual framework provided in Figure 1 It reflects the significant advances in data management analysis and synthesis that have been made over the past 10 years including new remote and in situ sensing techniques the emergence of ecological and environmental observatories novel evolutionary computations for knowledge discovery and forecasting and new approaches to communicating results and informing decisions Water Scarcity and Conflict in African River Basins Mahlakeng Khosi Mahlakeng, 2023-03-31 The book presents a critical and comparative analysis of the hydropolitical landscape of African transboundary river basins which for much of the past century have been affected by water scarcity River and lake basins can become a source of tension and conflict due to a complicated mix of environmental demographic diplomatic historical and geopolitical factors This book however specifically focuses on the important and often under looked role played by scarcity in generating or exacerbating conflicts in shared river basins Asserting that transboundary river basins tie states into a web of interdependence this book raises awareness of how water

scarcity or the depletion of water resources complicates this relationship as nations are forced to look beyond their own borders to meet the demand for water to satisfy multiple needs Taking a comparative approach it examines three shared basins the Orange Senqu the Nile and the Niger River basins While situated in different regions all three basins are marked by serious environmental challenges that are detrimental to combustible hydropolitics over such shared water resources and they provide fascinating insights into the links between climate variability and change water resources human security conflict adaptation and regime capacity Overall this book argues that conflict over transboundary resources can be prevented given the establishment of norms rules and the role of external actors that help regulate state behaviour and control their impacts This book will be of great interest to students and scholars of water resource management hydropolitics environmental conflict resource scarcity and international relations It will also be of interest to policymakers involved in transboundary water resource governance Social Constructions of Water Quality in South Africa Suvania

Naidoo,2022-05-04 This book details how the water quality of the Blesbokspuit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspuit resulted from human interventions and varied uses of the water over the years Such knowledge among factors such as the historical context of mining current coal mining flows and volumes of water technology used and processes followed information and communication and vested interests influence social constructions of the water quality What counts as the truth about water varies depending on the individual s perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government s silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspuit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government *The Origin and Growth of Geography as a discipline at South Africa*

Fees Must Fall Susan Booysen,2016-10-01 This book explores the student discontent a year after the start of the 2015

South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt

Contradictions of Democracy Nicholas Rush Smith,2019-01-17 Despite being one of the world s most vibrant democracies police estimate between five and ten percent of the murders in South Africa result from vigilante violence This is puzzling given the country s celebrated transition to democracy and massive reform of the state s legal institutions Where most studies explain vigilantism as a response to state or civic failure in *Contradictions of Democracy* Nicholas Rush Smith illustrates that vigilantism is actually a response to the processes of democratic state formation In the context of densely networked neighborhoods vigilante citizens often interpret the technical success of legal institutions for instance the arrest and subsequent release of suspects on bail as failure and work to correct such perceived failures on their own Smith also

shows that vigilantism provides a new lens through which to understand democratic state formation Among young men of color in some parts of South Africa fear of extra judicial police violence is common Amid such fear instead of the state seeming protective it can appear as something akin to a massive vigilante organization An insightful look into the high rates of vigilantism in South Africa and the general challenges of democratic state building Contradictions of Democracy explores fundamental questions about political order the rule of law and democratic citizenship Rescaling municipal governance amidst political competition in Gauteng: Sedibeng's proposed re-demarcation Thembani Mkhize,2021-08-27 In 2011 the Gauteng Provincial Government proposed that Sedibeng a Category C district municipality located in the province should be restructured Although the original proposal had anticipated that this would happen after the 2016 local elections the issue remains unresolved due largely to fierce party political opposition and vociferous protests against it on the ground This Occasional Paper examines the dynamics particularities peculiarities and challenges of re demarcating the Gauteng City Region While informed by technical reasons the arguments for and against the merger have tended to gravitate more towards party political rationales for why the re demarcation should or should not go ahead Although these debates raise important merits and demerits for the proposal they are difficult to disentangle from the interests of those whose fortunes would be changed by restructuring In this environment municipal demarcation risks being held hostage by party politics with stakeholders such as political parties using any means at their disposal to have things go their way including by scapegoating the Municipal Demarcation Board MDB The case of Sedibeng presents important lessons about attempts to make post transition local government and mechanisms for determining its configuration work for Gauteng It also highlights the need for strengthening and revising demarcation related legislation How can we make sure that the MDB functions effectively with respect to its primary goals *International Mediation in the South African Transition* Zwelethu Jolobe,2019-04-09 This book challenges the conventional understanding of South Africa s transition to democracy as a home grown process through a comparative analysis of Commonwealth and United Nations mediation attempts Approaching power transition through the lens of South Africa Zwelethu Jolobe raises questions about how methods and types of mediation are understood and their appropriateness for certain stages of negotiation processes International Mediation in the South African Transition calls into question the generalisations about the determinants of success by international third parties in resolving internal conflicts It moves from the position that the success of a mediation effort depends on the examination of the time horizon of a conflict and on the contribution the mediation effort plays in improving the relationship between the belligerents The book argues that the international community particularly the Commonwealth and the United Nations played a profound and beneficial role in the political transition to end apartheid International Mediation in the South African Transition will be of interest to students and scholars of African politics conflict resolution international relations and global governance University on the Border Lis Lange,Vasu Reddy,Siseko H. Kumalo,2021-08-27 The volume explores and thinks through the process of

decolonising the South African higher education system by examining MustFall The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university **Uranium** Anthony

Burke, 2017-07-03 Uranium the most atomically unstable natural element on earth has a unique place in the global geopolitics of resources It provides energy to millions of people and its isotopes are used to power spacecraft and in nuclear medicine But it is also at the heart of many of the planet's most deadly threats including nuclear devastation and radioactive waste Its mining has caused bitter conflict with indigenous peoples and its testing in nuclear weapons has left a toxic legacy Yet the nonproliferation regime which aims to phase out nuclear weapons and manage the risks of nuclear energy is at risk of unravelling In this book Anthony Burke explores the geopolitical intrigue around uranium and the dilemmas of justice and security to which its development has given rise The twenty first century he cautions will be a time of reckoning and new reserves of political will must be found to manage the impact of this extraordinary mineral Only by cooperating to achieve multilateral disarmament and greater international control over nuclear power can we ward off nuclear catastrophe and harness the potential of nuclear energy to help address rather than create some of the world's most pressing problems

Rethinking Revolution Leo Panitch, Greg Albo, 2016-12 One hundred years ago October 1917 galvanized leftists and oppressed peoples around the globe and became the lodestar for 20th century politics Today the left needs to reckon with this legacy and transcend it Social change as it was understood in the 20th century appears now to be as impossible as revolution leaving the left to rethink the relationship between capitalist crises as well as the conceptual tension between revolution and reform Populated by an array of passionate thinkers and thoughtful activists Rethinking Revolution reappraises the historical effects of the Russian revolution positive and negative on political intellectual and cultural life and looks at consequent revolutions after 1917 Change needs to be understood in relation to the distinct trajectories of radical politics in different regions But the main purpose of this Socialist Register edition one century after Red October is to look forward to what might happen next Acclaimed authors interrogate and explore compelling issues including Greg Albo New socialist strategies or detours Jodi Dean Are the multitudes communing Revolutionary agency and political forms today Adolph Reed Are racial minorities revolutionary agents Zillah Eisenstein Revolutionary feminisms today Nina Power Accelerated technology decelerated revolution David Schwartzman Beyond global warming Is solar communism possible Andrea Malm Revolution and counter revolution in an era of climate change **South Africa's water governance**
