Chenoweth, 2025-01-07 Within contemporary theory the concepts of translation and universality have frequently been associated with different and even opposed philosophical and political projects watchwords of either domination or liberation

the erasure of difference or the defense of difference The universalizing drives of capitalism colonialism and other systems of oppression have precipitated widespread suspicion of any appeal to universality This has led some in turn to champion the very notion of universality as antithetical to these systems of oppression Similarly recent scholarship has begun to grapple with the fundamental role of translation not only in forging inclusive democratic politics but also by contrast in violence including imperial expansion and global war The present volume advocates neither for nor against translation or universality as such Instead it attends to their insurmountable ambiguity and equivocity the tensions and contradictions that are internal to both concepts and that exist between them Indeed the wager of this volume is that translation universality and their relationship name irreducible yet overlapping sites of struggle for a diverse array of struggles on the Left Drawing from multiple intellectual traditions and orientations with a special emphasis on deconstruction and Marxism this volume both reveals and participates in a subterranean current of thought committed to theorizing the dynamic plural and ultimately inextricable relationship between translation and universality Its contributors approach this problem in ways that challenge and unsettle dominant trends within translation studies and critical and postcolonial theory thereby opening new lines of inquiry within and beyond these fields Contributors Ben Conisbee Baer Barbara Cassin Souleymane Bachir Diagne Cate Reilly Peter Thomas Gavin Walker Naomi Waltham Smith Gary Wilder

The Lens, 1929 **Capitalism at Work** Robert L. Bradley, 2014-05-14 Read the Intro Chapter PDF View the Ayn Rand Appendix View an interview with author Robert L Bradley Jr at Reason.com Capitalism took the blame for Enron although the company was anything but a free market enterprise and company architect was hardly a principled capitalist On the contrary Enron was a politically dependent company and in the end a grotesque outcome of America's mixed economy That is the central finding of Robert L Bradley's *Capitalism at Work* The blame for Enron rests squarely with political capitalism a system in which business firms routinely obtain government intervention to further their own interests at the expense of consumers taxpayers and competitors Although Ken Lay professed allegiance to free markets he was in fact a consummate politician Only by manipulating the levers of government was he able to transform Enron from a 3 billion natural gas company to a 100 billion chimera one that went in a matter of months from seventh place on Fortune's 500 list to bankruptcy But *Capitalism at Work* goes beyond unmasking Enron's sophisticated foray into political capitalism Employing the timeless insights of Adam Smith Samuel Smiles and Ayn Rand among others Bradley shows how fashionable anti-capitalist doctrines set the stage for the ultimate business debacle Those errant theories like Enron itself elevated form over substance ignored legitimate criticism and bypassed midcourse correction Political capital
