Just Touching the Memory Lyudmila Noble, 2013-06 Lyudmila Noble the author of the book *Just Touching the Memory* was born in a family of a well known doctor in the former Soviet Union From her very childhood she was introduced to the notions of humanism and altruism which were presented to her by her father Lyudmila Noble s father was her mentor and her role model In the former Soviet Union Lyudmila received her education as linguist educator and military nurse She majored in English German Later she got her Master s Degree in Social Work in New York USA In her book she invites her potential readers to think to analyze and to understand about the reasons which made Soviet people to leave their country As everyone is aware nobody leaves and departs from a good life On the surface her main character had a great career house family children husband But that was the tip of the iceberg The

underlying reason for her departure from the former Soviet Union was deep down and deeply hidden from the eyes of the bystanders In her book she tried to capture the most significant events which led the country to the collapse and made an impact of the destinies of the citizens of that country greatly Being a sensitive author she wants to say in her book My freedom is finishing when your freedom ends As a matter of fact in the former USSR the notions will and freedom were not separated The authorities did everything what they wanted to do in spite of the fact that they hurt constantly Soviet people the people of values and dignity The main purpose of this book is that very fact that the author intended to introduce relatively newly arrived Russian speaking community to the American Society To break stereotypes about Russians as the rigid people who came from the cold freezing country with similar personalities instead she shows the real Russians in the US

Managed Software Evolution Ralf Reussner, Michael Goedicke, Wilhelm Hasselbring, Birgit Vogel-Heuser, Jan Keim, Lukas Martin, 2019-06-26 This open access book presents the outcomes of the Design for Future Managed Software Evolution priority program 1593 which was launched by the German Research Foundation Deutsche Forschungsgemeinschaft DFG to develop new approaches to software engineering with a specific focus on long lived software systems The different lifecycles of software and hardware platforms lead to interoperability problems in such systems Instead of separating the development adaptation and evolution of software and its platforms as well as aspects like operation monitoring and maintenance they should all be integrated into one overarching process Accordingly the book is split into three major parts the first of which includes an introduction to the nature of software evolution followed by an overview of the specific challenges and a general introduction to the case studies used in the project The second part of the book consists of the main chapters on knowledge carrying software and cover tacit knowledge in software evolution continuous design decision support model based round trip engineering for software product lines performance analysis strategies maintaining security in software evolution learning from evolution for evolution and formal verification of evolutionary changes In turn the last part of the book presents key findings and spin offs The individual chapters there describe various case studies along with their benefits deliverables and the respective lessons learned An overview of future research topics rounds out the coverage The book was mainly written for scientific researchers and advanced professionals with an academic background They will benefit from its comprehensive treatment of various topics related to problems that are now gaining in importance given the higher costs for maintenance and evolution in comparison to the initial development and the fact that today most software is not developed from scratch but as part of a continuum of former and future releases
