Ferreira Cunha-Junior, Juliana Da Silva Pacheco, Gabriela Santos-Gomes, Joao Luiz Mendes Wanderley, Suzana Passos Chaves, Valter Viana Andrade-Neto, Lucia Helena Pinto da Silva, 2024-05-15 Leishmaniasis are a group of tropical diseases that affect millions of people worldwide. They are considered neglected diseases prevalent in emerging countries in Latin America, West Africa and Southeast Asia and still occurring in Mediterranean countries. There is no human vaccine available to prevent and control the disease infection. For the last 70 years, the available chemotherapy has been constituted by first line pentavalent antimonials and second line drugs amphotericin B, pentamidine, paramomycin and miltefosine. Its route of administration is difficult, the treatment is long and its efficiency varies depending on the parasite species and clinical manifestations, which results in the emergence of resistant cases. Moreover, they present high toxicity to patients and even some less toxic formulations available are still expensive for the poorest countries' vulnerable populations. This often leads to abandonment and failure of treatment. The medical scientific community is facing difficulties to overcome these issues with new suitable therapies and the identification of new drug targets. So it means that efforts to identify new strategies must continue.

Bioprocess and Analytics Development for Virus-based Advanced Therapeutics and Medicinal Products (ATMPs) Saurabh Gautam, Abhilash I. Chiramel, Roland Pach, 2023-08-10 This book reviews the knowledge, methods and available techniques in the rapidly advancing field of virus-based vaccines and gene therapeutics. It also highlights new innovative tools and interdisciplinary techniques for bioprocess development and analytics of viruses and viral vectors. As such, it provides a timely and highly relevant resource since current advances in pharmaceutical research have seen the rise of vaccines and advanced therapeutics and medicinal products (ATMPs) that rely on the power of viruses. However, developing bioprocesses and analytics required to create this often-called magic bullet, i.e. gene therapy, remains an extremely challenging and costly task. This book offers strategies for overcoming hurdles and difficulties within all the necessary steps of viral vector development, from scalability to purification methods and quality control. The book is intended for researchers working in academia or industry as well as graduate students pursuing a career in virology. *Index of Specifications and Standards*, [Integrated and Strategic Advancements in Decision Making Support Systems](#) Zarate, Pascale, 2012-06-30 This book explores the world of Decision Making Support Systems (DMSS) which encompasses Decision Support Systems (DSS), Executive Information Systems (EIS), Expert Systems (ES), Knowledge Based Systems (KBS), Creativity Enhancing Systems (CES) and more. Asset management's transition from an art and craft to an industry has inevitably called integrated business models into question, favouring specialisation strategies based on cost optimisation and learning curve objectives. This book connects each of these major categories of techniques and practices to the unifying and seminal conceptual developments of modern portfolio theory. In these bear market times

performance evaluation of portfolio managers is of central focus This book will be one of very few on the market and is by a respected member of the profession Allows the professionals whether managers or investors to take a step back and clearly separate true innovations from mere improvements to well known existing techniques Puts into context the importance of innovations with regard to the fundamental portfolio management questions which are the evolution of the investment management process risk analysis and performance measurement Takes the explicit or implicit assumptions contained in the promoted tools into account and by so doing evaluate the inherent interpretative or practical limits Reprogramming the
