Infrastructure Protection XVI Jason Staggs, Sujeet Shenoi, 2022-11-29. The information infrastructure comprising computers, embedded devices, networks, and software systems is vital to operations in every sector: chemicals, commercial facilities, communications, critical manufacturing, dams, defense, industrial base, emergency services, energy, financial services, food and agriculture, government facilities, healthcare, and public health, information technology, nuclear reactors, materials, and waste, transportation systems, and water and wastewater systems. Global business and industry governments indeed society itself cannot function if major components of the critical information infrastructure are degraded, disabled, or destroyed. Critical Infrastructure Protection XVI describes original research results and innovative applications in the interdisciplinary field of critical infrastructure protection. Also, it highlights the importance of weaving science, technology, and policy in crafting sophisticated yet practical solutions that will help secure information, computer, and network assets in the various critical infrastructure sectors. Areas of coverage include Industrial Control Systems Security, Telecommunications Systems Security, Infrastructure Security. This book is the 16th volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.10 on Critical Infrastructure Protection, an international community of scientists, engineers, practitioners, and policy makers dedicated to advancing research, development, and implementation efforts focused on infrastructure protection. The book contains a selection of 11 edited papers from the Fifteenth Annual IFIP WG 11.10 International Conference on Critical Infrastructure Protection held as a virtual event during March 2022. Critical Infrastructure Protection XVI is an important resource for researchers, faculty members, and graduate students, as well as for policy makers, practitioners, and other individuals with interests in homeland security. Engineering and Computing 2016 Efthymou Kyriacou, Stelios Christofides, Constantinos S. Pattichis, 2016-03-31 This volume presents the proceedings of Medicon 2016 held in Paphos Cyprus. Medicon 2016 is the XIV in the series of regional meetings of the International Federation of Medical and Biological Engineering IFMBE in the Mediterranean. The goal of Medicon 2016 is to provide updated information on the state of the art on Medical and Biological Engineering and Computing under the main theme Systems Medicine for the Delivery of Better Healthcare Services. Medical and Biological Engineering and Computing cover complementary disciplines that hold great promise for the advancement of research and development in complex medical and biological systems. Research and development in these areas are impacting the science and technology by advancing fundamental concepts in translational medicine by helping us understand human physiology and function at multiple levels by improving tools and techniques for the detection, prevention and treatment of disease. Medicon 2016 provides a common platform for the cross fertilization of ideas and to help shape knowledge and scientific achievements by bridging complementary disciplines into an interactive and attractive forum under the special theme of the conference that is Systems Medicine for the Delivery of Better Healthcare Services. The programme consists of some 290 invited and submitted papers on new developments around the Conference theme presented in 3 plenary sessions, 29 parallel scientific sessions and 12 special sessions.
