

The SAIW Centre for Welding Engineering at the University of Pretoria offers internationally accredited postgraduate degree programmes in Welding Engineering and Welding Technology.

### Why study Welding Engineering?

South Africa is currently experiencing a severe shortage of qualified welding engineers and welding technologists – skills that are in high demand in industry.

The training of **International Welding Engineers (IWEs)** and **Welding Technologists (IWTs)** is regulated internationally and the International Institute of Welding's training programme 'International Education and Qualification System for Welding Personnel' is the only system recognised worldwide. The IIW training system is well supported by local and international industry and recognised by international training and accreditation entities such as the current ISO and CEN bodies.

### Why study Welding Engineering at the University of Pretoria?

- The University of Pretoria IWE and IWT programmes are fully accredited by the International Institute of Welding (IIW).
- The University of Pretoria is well positioned for welding education, with more than 20 years of experience in welding research and teaching.

- Locally developed course material is supplemented by internationally approved web-based multimedia Distance Learning material developed in Germany by GSI-SLV.
- Web-based learning support is provided through the University of Pretoria ClickUP WebCT system.
- Training is presented on a part-time basis and the flexible distance learning approach reduces on-campus contact time to only four weeks, lowering costs and catering for the wide geographical distribution of prospective students.

Bhadeshia, 2013-03-01 The Trends conference attracts the world's leading welding researchers. Topics covered in this volume include friction stir welding sensing control and automation microstructure and properties welding processes procedures and consumables weldability modeling phase transformations residual stress and distortion physical processes in welding and properties and structural integrity of weldments.

**Engineering Applications of Fracture Analysis** G. G. Garrett, D. L. Marriott, 2014-05-23 Engineering Applications of Fracture Analysis is a record of the proceedings of the First National Conference on Fracture held at Johannesburg South Africa in November 1979. The papers presented in the conference provide a general picture of fracture studies in South Africa. The contributions cover the theoretical analyses of the influence of dislocation stresses in initiating fracture, practical design of steel components exposed to high temperature environments, problems encountered in South African industry such as rock drilling equipment failures, unwanted rock fractures in mines and safety problems in nuclear reactors, fracture study techniques and formal applications of fracture mechanics. The book will be of interest to metallurgists, engineers and materials specialists.

**Advances in Friction-Stir Welding and Processing** M.-K. Besharati-Givi, P. Asadi, 2014-12-08 Friction stir welding (FSW) is a solid state joining process primarily used on aluminum and is also widely used for joining dissimilar metals such as aluminum, magnesium, copper and ferrous alloys. Recently a friction stir processing (FSP) technique based on FSW has been used for microstructural modifications, the homogenized and refined microstructure along with the reduced porosity resulting in improved mechanical properties. **Advances in friction stir welding and processing** deals with the processes involved in different metals and polymers including their microstructural and mechanical properties, wear and corrosion behavior, heat flow and simulation. The book is structured into ten chapters covering applications of the technology, tool and welding design, material and heat flow, microstructural evolution, mechanical properties, corrosion behavior and wear properties. Later chapters cover mechanical alloying and FSP as a welding and casting repair technique, optimization and simulation of artificial neural networks and FSW and FSP of polymers. Provides studies of the microstructural, mechanical, corrosion and wear properties of friction stir welded and processed materials. Considers heat generation, heat flow and material flow. Covers simulation of FSW, FSP and use of artificial neural network in FSW, FSP.
