In this context wellness has developed into a significant dimension of tourism in a number of new and long established destinations. However although it is consistently referred to as one of the most rapidly growing forms of tourism worldwide there still remains a dearth of academic literature on this topic. This book uniquely focuses on the supply side of wellness tourism from a destination perspective in terms of the generation and delivery of products and services for tourists who seek to maintain and improve their health. This approach provides a better understanding of how wellness tourism destinations develop and explores the specific drivers of that growth in a destination context and how destinations successfully compete against each other in globalised market place. A range of wellness destination development and management issues are examined including the importance of authenticity an appropriate policy framework delivery of high quality goods and services participation of a broad range of stakeholders and the development of networks and clusters as well as collaborative strategies essential for a successful development and management of a wellness tourism destination. International case studies and examples from established and new wellness tourism destinations are integrated throughout. This timely volume written by leaders in this sector will be of interest to tourism and hospitality students and academics internationally.
