Black,2016-07-01 South Africa s high rate of unemployment 26.4% makes it a complete outlier compared with other middle income countries Indeed the unemployment rate rises to 36% if discouraged workers are taken into account It underpins extreme poverty and inequality and is a major contributor to social dislocation If it were not for increased social payments poverty would have continued to increase since the advent of democracy in 1994 Unemployment also represents a huge cost to growth This book focuses on the growth path of the economy The starting point is that while more rapid economic expansion is an important objective at any given level of growth the economy as a whole needs to become more labour absorbing The central question posed is how to bring about changes in the economic structure and pattern of development which would lead to the attainment of this objective The authors argue that employment needs to be much more centrally positioned within the economic and social policy arena They emphasise innovative approaches within a broader focus on the growth path and employment intensive growth And they posit that the negative impact of previous distortions requires much more than a levelling of the playing field via market based reforms Apart from presenting an alternative growth path which could start to shift the economy in new directions the book tackles themes which have received only limited attention such as wage subsidies youth unemployment and employment growth in rural areas *Low-Income Students, Human Development and Higher Education in South Africa* Melanie Walker, Monica McLean,2022-07-15 This book explores learning outcomes for low income rural and township youth at five South African universities The book is framed as a contribution to southern and Africa centred scholarship adapting Amartya Sen s capability approach and a framework of key concepts capabilities functionings context conversion factors poverty and agency to investigate opportunities and obstacles to achieved student outcomes This approach allows a reimagining of inclusive learning outcomes to encompass the multi dimensional value of a university education and a plurality of valued cognitive and non cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship Based on capability theorising and student voices the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason

to value The book concludes that sufficient material resources are necessary to get into university and flourish while there the benefits of a university education should be rich and multi dimensional so that they can result in functionings in all areas of life as well as work and future study the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for inclusive learning outcomes to be meaningful and that universities ought to be doing more to enable black working class students to participate and succeed Low Income Students Human Development and Higher Education in South Africa makes an original contribution to capability scholarship conceptually in theorising a South based multi dimensional student well being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in depth mixed methods research on students lives and experiences in higher education in South Africa The audience for the book includes higher education researchers international capability scholars practitioners and policy makers
