Using Priming Methods In Second Language Research:

Using Priming Methods in Second Language Research Kim McDonough, Pavel Trofimovich, 2011-02-25 *Using Priming Methods in Second Language Research* is an accessible introduction to the use of auditory semantic and syntactic priming methods for second language L2 processing and acquisition research. It provides a guide for the use, design, and implementation of priming tasks and an overview of how to analyze and report priming research. Key principles about auditory semantic and syntactic priming are introduced and issues for L2 researchers to consider when designing priming studies are pointed out. Empirical studies that have adopted priming methods are highlighted to illustrate the application of experimental techniques from psychology to L2 processing and acquisition research. Each chapter concludes with follow-up questions and activities that provide additional reinforcement of the chapter content, while the final chapter includes data sets that can be used to practice the statistical tests commonly used with priming data. **Applying Priming Methods to**

L2 Learning, Teaching and Research Pavel Trofimovich, Kim McDonough, 2011 This volume features a collection of empirical studies which use priming methods to explore the comprehension, production, and acquisition of second language L2 phonology, syntax, and lexicon. The term priming refers to the phenomenon in which prior exposure to specific language forms or meanings influences a speaker's subsequent language comprehension or production. This book brings together the various strands of priming research into a single volume that specifically addresses the interests of researchers, teachers, and students interested in L2 teaching and learning. Chapters by internationally known scholars feature a variety of priming techniques, describe various psycholinguistic tasks, and focus on different domains of language knowledge and skills. The book is conceptualized with a wide audience in mind, including researchers not familiar with priming methods and their application to L2 research, graduate students in second language acquisition and related disciplines, and instructors who require readings for use in their courses.
