UofU Tree Identification Tour

Michael Kuhns, Forestry Extension Specialist and Meridith Perkins, State Urban Forestry Coordinator

Trees on the University of Utah (UofU) campus are very diverse. As a designated State Arboretum the UofU values its urban forest resources and readily shares them with the public. Here we highlight some of the most interesting trees in the western part of campus, including key identifying characteristics for each species. Green markers indicate gymnosperms and yellow angiosperms. Visit <http://www.uofu.edu> to find this tour on the web with an interactive map and GPS coordinates, current as of August 12, 2011. Consider carrying a tree identification book with you when you go out. Tree identification tips and references are listed on the last page.

Northern Mountain and Prairie Community Tree Guide, 2003 **Urban & Community Forestry** Craig William Johnson, 1990 Woody Plants of Utah Renee Van Buren, Janet G. Cooper, Leila M. Shultz, Kimball T. Harper, 2012-01-06 A comprehensive guide that includes a vast range of species and plant communities and employs thorough original keys Based primarily on vegetative characteristics the keys don't require that flowers or other reproductive features be present like many plant guides And this guide's attention to woody plants as a whole allows one to identify a much greater variety of plants That especially suits an arid region such as Utah with less diverse native trees Woody plants are those that have stems that persist above ground even through seasons that don't favor growth due to low precipitation or temperatures Woody Plants of Utah employs dichotomous identification keys that are comparable to a game of twenty questions They work through a process of elimination by choosing sequential alternatives Detailed illustrated plant descriptions complement the keys and provide additional botanical and environmental information in relation to a useful introductory categorization of Utah plant communities Supplementary tools include photos distribution maps and an illustrated glossary Trees of Utah and the Intermountain West Michael Richard Kuhns, 1998 A comprehensive guide to the all native and introduced trees of the Intermountain West Includes identification keys and hundreds of authoritative illustrations **The Practical Streambank Bioengineering Guide** Gary Bentrup, 1998 **Xeriscape Plant Guide** Rob Proctor, 1996 100 water wise plants for gardens and landscapes **Trees of Utah** Sherman G.
