Massimino Cocuzza, Prof. Arthur Agnello, Dr Elizabeth H. Beers, Dr Matthew J. Grieshop, 2023-01-24 This collection features four peer-reviewed reviews on managing arthropod pests in tree fruit. The first chapter provides a brief overview of the major aphid pests affecting tree fruit production, focussing on those causing economic damage in citrus, apple, pear, and stone fruit production. The chapter considers the techniques available for their control and looks ahead to future research in this area. The second chapter addresses the complex issue of managing and controlling arthropod pests in tree fruit production in the face of increasing pesticide regulatory restrictions as well as public concerns about food safety and environmental impact. The chapter considers the need for a more basic understanding of pest biology and development which can then be used in predictive models to support the effective use of more selective and sustainable crop protection methods. The third chapter introduces key arthropod pests of apples and highlights the importance of integrated pest management (IPM) programmes in controlling infestations. The chapter reviews the tools and tactics available as part of a sustainable IPM programme as well as current and future challenges facing IPM. The final chapter outlines key cultural tactics for managing arthropod pests in temperate tree fruit, including the modification of trees, tree architecture, orchard floor management, cultivation practices, mowing, and the cultivation of orchard cover crops. **The Report: South Africa 2014** Oxford Business Group, 2014-12-08 Indeed, since the end of apartheid in 1994, South Africa has

become a major diplomatic player both on the African continent as well as further afield. Despite the size of South Africa's economy, the country currently faces a number of major economic challenges. As of the end of July 2014, the unemployment rate was at 25.5% according to data from Statistics South Africa, which was among the highest in the world. While the government's long-term development plans are generally highly regarded, delivery and execution has occasionally been problematic. While there are major hurdles that must be cleared, given the country's strong institutions and the rapid pace of economic expansion over the past two decades, South Africa should be able to look forward to 20 more years of peace and steady, sustained economic growth. *The Water Legacies of Conventional Mining* James E. Nickum, David B.

Brooks, Anthony Turton, Surina Esterhuyse, 2018-10-15. The impact of mining is too big to ignore in a world of oversubscribed water. This is true of conventional mining as much as or even more than hydraulic fracturing/fracking. The legacy issues of such mining on water have not been fully appreciated, especially the irretrievable effects mining has had on communities and ecosystems around the world through its impact on water. Yet this is not an us or them problem; the wealth, influence, and technical knowledge of mining interests can and must be part of the solution. All of the contributions to this volume either consider the deficiencies of existing governance structures and the need for better ones or explore the use of new techniques to identify and evaluate social and environmental impacts. The chapters in this book were originally published in the journal *Water International*. **Renewable Energies Offshore** C. Guedes Soares, 2015-09-07. *Renewable Energies Offshore* includes the papers presented in the 1st International Conference on Renewable Energies Offshore (RENEW2014) held in Lisbon, 24-26 November 2014. The conference is a consequence of the importance of the offshore renewable energies worldwide and an opportunity to contribute to the exchange of information on the dev.
