ICEL 2018 13th International Conference on

e-Learning Professor Eunice Ivala, 2018-07-05 *University on the Border* Lis Lange, Vasu Reddy, Siseko H.

Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally

The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border. The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution the university.

Transforming Universities in South Africa, 2020-08-31 The idea of transformation in higher education underpins all policy documents, academic literature and on going debates in South Africa. Transforming Universities in South Africa: Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa's higher education stands across the continent and globally, particularly within the country's efforts to overcome decades of socio economic imbalances. It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally. This volume's ultimate purpose is to provide a basis for imagining new futures in which South Africa's higher education in the context of Africa and the global world takes centre stage.

Negotiating Quality Concerns in Higher Education amidst Disruptions Felix Maringe, Otilia Chiramba, 2025-06-02 Quality is at the heart of organisational development. It is the one single reason organisations make progress or fail dismally when it is absent. Disruptions can both be a catalyst for innovation and progress on one hand but when they are not well handled they can cause organisations to spiral into catastrophe and oblivion. This book is about how best to safeguard quality both during and beyond disruptions. Based largely on research in South Africa, the collection of essays will resonate with multiple higher education contexts and audiences. Collectively the essays provide compelling reading for practitioners, academics, researchers and policy makers in higher education. The book's central message is that while disruptions can expose our organisational weaknesses they create several opportunities to drive change and transformation. The essays here capture the transition from crisis to high performance and ways in which universities can navigate such journeys.

Being Scholarly Liezel Frick, Vernon Trafford, Magda Fourie-Malherbe, 2016-01-05 In this discussion of higher education studies in South Africa we attempt to illustrate how higher education studies in South Africa reflect both global and local trends and concerns and how the publications by Eli Bitzer over the course of his involvement and dedication to the field for thirty years have contributed to our understanding of this field.

Quality Management Implementation in Higher Education: Practices, Models, and Case Studies Sony, Michael, Karingada, Kochu Therisa, Baporikar, Neeta, 2019-08-02 Although initially utilized in business and industrial environments, quality management systems can be adapted into higher education to assess and improve an institution's standards. These strategies are now playing a vital role in educational areas such as teaching, learning and institutional level practices. However, quality management tools and models must be adapted to fit with the culture of higher

education Quality Management Implementation in Higher Education Practices Models and Case Studies is a pivotal reference source that explores the challenges and solutions of designing quality management models in the current educational culture. Featuring research on topics such as Lean Six Sigma distance education and student supervision, this book is ideally designed for school board members, administrators, deans, policymakers, stakeholders, professors, graduate students, education professionals, and researchers seeking current research on the applications and success factors of quality management systems in various facets of higher education.

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education, the images of dysfunction are everywhere. Student protests, violence, police presence, rubber or real bullets, class disruptions, burning tyres, damaged buildings, injury, and sometimes death. Reports of wholesale corruption. Year after year, often in the same set of universities, the problem of routine instability seems insoluble. The financial, academic, and reputational costs of ongoing dysfunction are high, especially for those universities caught up in the never-ending struggle to overcome apartheid legacies. Any number of explanations have been ventured, including a lack of resources, shortage of capacity, rural location, corrupt officials, and endemic conflict. *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities. At the heart of the problem lies the vexed issue of resources, or more pertinently, the relationship between resources and power: who gets what and why? Whatever else it aspires to be, commonly a place of teaching, learning, research, and public duty, a university in an impoverished community is also a rich concentration of resources around which corrupt staff, students, and those outside of campus all vie for access. Taking a political-economic approach, Jonathan Jansen describes the daily struggle for institutional resources and offers accessible, sensible insights. He argues that the problem won't be solved through investments in capacity building alone, because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Rather, durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions. This groundbreaking and long-overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly.
