Rittersma, 2010 Painting a panoramic view of conspicuous consumption in the Netherlands and Flanders from 1500 to the present this collection of essays explores the economic forces that produce a boom in luxury goods Working from disciplines such as archaeology art history historical ethnology linguistics and media studies these scholarly contributors explore both the wealth and the social display that fuels the search for rare commodities [New York Magazine](#) , 1985-06-10 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *Dramatic Mirror of Motion Pictures and the Stage* , 1917 **The Psychology of Graphic Images** Manfredo Massironi, Translated by N Bruno, 2001-08-01 This book explores the nature of one of the most ancient tools for nonverbal communication drawings They are naturally adaptable enough to meet an incredibly wide range of communication needs But how exactly do they do their job so well Avoiding the kinds of aesthetic rankings of different graphic domains so often made by art historians and

critics Manfredo Massironi considers an extensive and representative sample of graphic applications with an open mind He finds a deep mutuality between the material components of images and the activation of the perceptual and cognitive processes that create and decipher them Massironi first examines the material components themselves the mark or line the plane of representation the angle formed by the actual drawing surface and the depicted objects and the position of the viewpoint relative to the depicted objects The roles played by these three components are independent of the content of the drawing they function in the same way in concrete and abstract representations He then closely scrutinizes the choices made by the person planning and executing the drawings Given that any object can be depicted in an infinite number of different ways the drawer performs continuous work emphasizing and excluding different features The choices are typically unconscious and guided by his or her communicative goals A successful graph be it simple or complex is always successful precisely because the emphasized features are far fewer in number than the excluded ones Finally he analyzes the perceptual and cognitive integrations made by the viewer Drawings are not simply tools for communication but important instruments for investigating reality and its structure Richly illustrated the book includes a series of graphic exercises that enable readers to get a sense of their own perceptual and cognitive activity when inspecting images Massironi s pathbreaking taxonomy of graphic productions will illuminate all the processes involved in producing and understanding graphic images for a wide audience in fields ranging from perceptual and cognitive psychology through human factors and graphic design to architecture and art history
