

Mystery Book Report

Mysteries are fictional stories that are usually realistic. They are about a mysterious event which is not explained or a crime that is not solved until the end of the story to keep the reader in suspense.

1. Read a mystery chapter book of at least 100 pages. Please do not read any Brownie Children's Note the Clues, Figure It Out, Clue Books, or High Rise Detectives books as the reading level are too low for fourth graders. Nancy Drew, Hardy Boys, and Doreen Rappaport books are great reads, but visit the local library and ask the librarian for suggestions.

2. Create a "Mystery Skeleton"

Directions

Tell about the "body" of the story you read this month. Put together a "skeleton" model to use in your story presentation. I'll hang it up when you're finished. Use index cards or stiff paper. Put the skeleton together with string or yarn.

Head Draw and color the face of the main character. Write your name on back of the head and describe the main character in full sentences and your best guesses.

Chest/Upper Torso Draw & color the setting where and when the story takes place. Write at least one sentence (in narrative) that describes the setting.

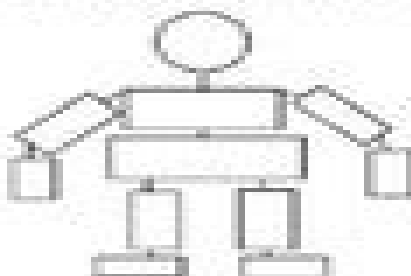

Abdomen/Hips Write 3-5 sentences in your best narrative that explain the main problem or mystery in the book.

Upper Arms Write the names of other important characters. Add how each relates to the problem or main character in full, narrative sentences.

Lower Arms Write at least 3 other problems in complete, narrative sentences, the main character must solve on the way to solving the main problem.

Legs Write ways the character gets out of the mystery or solves the main problem – the climax and solution.

Feet Write one thing you liked about the book in a sentence in narrative on each foot and explain why.

Pathways to Complexity M. Kathryn Brown,George J. Bey III,2021-04-27 Pathways to Complexity synthesizes a wealth of new archaeological data to illuminate the origins of Maya civilization and the rise of Classic Maya culture In this volume prominent Maya scholars argue that the development of social religious and economic complexity began during the Middle Preclassic period 1000 300 B C hundreds of years earlier than previously thought Contributors reveal that villages were

present in parts of the lowlands by 1000 B C challenging the prevailing models estimating when civilization took root in the area Combining recent discoveries from the northern lowlands an area often neglected in other volumes and the southern lowlands the collection then traces the emergence of sociopolitical inequality and complexity in all parts of the Yucatan peninsula over the course of the Middle Preclassic period They show that communities evolved in different ways due to influences such as geographical location ceramic exchange shell ornament production agricultural strategy religious ritual ideology and social rankings These varied pathways to complexity developed over half a millennium and culminated in the institution of kingship by the Late Preclassic period Presenting exciting work on a dynamic and poorly understood time period Pathways to Complexity demonstrates the importance of a broad comparative approach to understanding Preclassic Maya civilization and will serve as a foundation for future research and interpretation Contributors M Kathryn Brown Dr George Bey III Tara Bond Freeman Fernando Robles Castellanos Tomas Gallareta Negron E Wyllys Andrews V Anthony Andrews David S Anderson Lauren Sullivan Jaime J Awe James F Garber Mary Jane Acu a William Saturno Bobbi Hohmann Terry Powis Paul Healy Richard Hansen Donald W Forsyth David Freidel Barbara Arroyo Richard E W Adams A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase Annual Reports of the Navy Department for the Fiscal Year ...
