The Science I Know Culturally Relevant Science Lessons from Secondary Classrooms is a collection of culturally relevant lesson plans written by secondary science teachers. Each lesson discusses how the tenets of academic success, cultural competence, and critical consciousness that are part of the theory of Culturally Relevant Pedagogy (CRP) are addressed. Ladson Billings (1995). Additionally, each lesson plan is structured following the 5E learning cycle (Bybee, 2006) and aligned to the Next Generation Science Standards (NAS, 2012). The goal of this book is to help science teachers understand how to go about designing lessons that are culturally relevant. The hope is that the lessons detailed in each chapter will inspire teachers to draw the cultural knowledge from their students and capitalize on it when designing science lessons. After an introductory chapter that discusses how science education has shifted in recent decades to address the needs of diverse students, the main body of the text is divided into three sections. The first part introduces Culturally Relevant Pedagogy (CRP) as a framework; this is important for those readers unfamiliar with Gloria Ladson Billings' work. It addresses and discusses the three tenets of CRP: Academic Success, Cultural Competence, and Critical Consciousness, and it includes an explanation of how each area can be observed and addressed in science education specifically. The second part features lesson plans from secondary science classrooms written by teachers from different subject areas, i.e., life science, physical science, earth science, etc. The lesson plans follow the 5E Instructional Model (Bybee et al., 2006). This model promotes inquiry by guiding teachers in the design of lesson plans that are based upon cognitive psychology, constructivist learning theory, and best practices in science teaching. Duran, Education and Culture, Learner Differences, Secondary Science Pedagogy, Culturally Relevant Science, and Multicultural Education.
