The Material Life of Roman Slaves Sandra R. Joshel, Lauren Hackworth Petersen, 2015-10-01 The Material Life of Roman Slaves is a major contribution to scholarly debates on the archaeology of Roman slavery Rather than regarding slaves as irretrievable in archaeological remains the book takes the archaeological record as a key form of evidence for reconstructing slaves lives and experiences Interweaving literature law and material evidence the book searches for ways to see slaves in the various contexts to make them visible where evidence tells us they were in fact present Part of this project involves understanding how slaves seem irretrievable in the archaeological record and how they are often actively if unwittingly left out of guidebooks and scholarly literature Individual chapters explore the dichotomy between visibility and invisibility and between appearance and disappearance in four physical and social locations urban houses city streets and neighborhoods workshops and villas

Neural Network Applications J.G. Taylor, 2012-12-06 Neural Network Applications contains the 12 papers presented at the second British Neural Network Society Meeting NCM 91 held at King s College London on 1st October 1991 The meeting was sponsored by the Centre for Neural Networks King s College and the British Neural Network Society and was also part of the DEANNA ESPRIT programme The papers reflect the wide spectrum of neural network applications that are currently being attempted in industry and medicine They cover medical diagnosis robotics plant control machine learning and visual inspection as well as more general discussions on net learning and knowledge representation The breadth and depth of coverage is a sign of the health of the subject as well as indicating the importance of neural network developments in industry and the manner in which the applications are progressing Among the actual topics covered are Learning algorithms theory and practice A review of medical diagnostic applications of neural networks Simulated ultrasound tomographic imaging of defects Linear quadtrees for neural network based position invariant pattern recognition The pRTAM as a hardware realisable neuron The

cognitive modalities CM system of knowledge representation the DNA of neural networks This volume provides valuable reading for all those attempting to apply neural networks as well as those entering the field including researchers and postgraduate students in computational neuroscience neurobiology electrical engineering computer science mathematics and medicine

The Church History of the First Three Centuries Ferdinand Christian Baur, 1879 *Bondsmen and Bishops* J. Harry Bennett, 1980 Artificial Neural Nets and Genetic Algorithms Rudolf F. Albrecht, Colin R. Reeves, Nigel C. Steele, 2012-12-06

Artificial neural networks and genetic algorithms both are areas of research which have their origins in mathematical models constructed in order to gain understanding of important natural processes By focussing on the process models rather than the processes themselves significant new computational techniques have evolved which have found application in a large number of diverse fields This diversity is reflected in the topics which are the subjects of contributions to this volume There are contributions reporting theoretical developments in the design of neural networks and in the management of their learning In a number of contributions applications to speech recognition tasks control of industrial processes as well as to credit scoring and so on are reflected Regarding genetic algorithms several methodological papers consider how genetic algorithms can be improved using an experimental approach as well as by hybridizing with other useful techniques such as tabu search The closely related area of classifier systems also receives a significant amount of coverage aiming at better ways for their implementation Further while there are many contributions which explore ways in which genetic algorithms can be applied to real problems nearly all involve some understanding of the context in order to apply the genetic algorithm paradigm more successfully That this can indeed be done is evidenced by the range of applications covered in this volume

Encyclopedia of African American History, 1619-1895 Paul Finkelman, 2006-04-06 It is impossible to understand America without understanding the history of African Americans In nearly seven hundred entries the Encyclopedia of African American History 1619 1895 documents the full range of the African American experience during that period from the arrival of the first slave ship to the death of Frederick Douglass and shows how all aspects of American culture history and national identity have been profoundly influenced by the experience of African Americans The Encyclopedia covers an extraordinary range of subjects Major topics such as Abolitionism Black Nationalism the Civil War the Dred Scott case Reconstruction Slave Rebellions and Insurrections the Underground Railroad and Voting Rights are given the in depth treatment one would expect But the encyclopedia also contains hundreds of fascinating entries on less obvious subjects such as the African Grove Theatre Black Seafarers Buffalo Soldiers the Catholic Church and African Americans Cemeteries and Burials Gender Midwifery New York African Free Schools Oratory and Verbal Arts Religion and Slavery the Secret Six and much more In addition the Encyclopedia offers brief biographies of important African Americans as well as white Americans who have played a significant role in African American history from Crispus Attucks John Brown and Henry Ward Beecher to Olaudah Equiano Frederick Douglass Sarah Grimke Sojourner Truth Nat Turner Phillis Wheatley

and many others All of the Encyclopedia's alphabetically arranged entries are accessibly written and free of jargon and technical terms To facilitate ease of use many composite entries gather similar topics under one headword The entry for Slave Narratives for example includes three subentries The Slave Narrative in America from the Colonial Period to the Civil War Interpreting Slave Narratives and African and British Slave Narratives A headnote detailing the various subentries introduces each composite entry Selective bibliographies and cross references appear at the end of each article to direct readers to related articles within the Encyclopedia and to primary sources and scholarly works beyond it A topical outline chronology of major events nearly 300 black and white illustrations and comprehensive index further enhance the work's usefulness

Women and Slaves in Greco-Roman Culture Sandra R. Joshel, Sheila Murnaghan, 2005-08-12 *Women and Slaves in Classical Culture* examines how ancient societies were organized around slave holding and the subordination of women to reveal how women and slaves interacted with one another in both the cultural representations and the social realities of the Greco-Roman world The contributors explore a broad range of evidence including the mythical constructions of epic and drama the love poems of Ovid the Greek medical writers Augustine's autobiography a haunting account of an unnamed Roman slave the archaeological remains of a slave mining camp near Athens They argue that the distinctions between male and female and servile and free were inextricably connected This erudite and well-documented book provokes questions about how we can hope to recapture the experience and subjectivity of ancient women and slaves and addresses the ways in which femaleness and servility interacted with other forms of difference such as class gender and status *Women and Slaves in Classical Culture* offers a stimulating and frequently controversial insight into the complexities of gender and status in the Greco-Roman world

[The Barber of Natchez Reconsidered](#) Timothy R. Buckner, 2023-08-30 Winner of the Jules and Frances Landry Award Historians have long considered the diary of William Johnson a wealthy free Black barber in Natchez Mississippi to be among the most significant sources on free African Americans living in the antebellum South Timothy R Buckner's The Barber of Natchez Reconsidered reexamines Johnson's life using recent scholarship on Black masculinity as an essential lens demonstrating a complexity to Johnson previously overlooked in academic studies While Johnson's profession as a barber helped him gain acceptance and respectability it also required his subservience to the needs of his all white clientele Buckner's research counters earlier assumptions that suggested Johnson held himself apart from Natchez's Black population revealing instead a man balanced between deep connections to the broader African American community and the necessity to cater to white patrons for economic and social survival Buckner also highlights Johnson's participation in the southern performance of manliness to a degree rarely seen in recent studies of Black masculinity Like many other free Black men Johnson asserted his manhood in ways beyond simply rebelling against slavery he also competed with other men white and Black free and enslaved in various masculine pursuits including gambling hunting and fishing Buckner's long overdue reevaluation of the contents of Johnson's diary serves as a corrective to earlier works and a fascinating new account of a free African American business owner residing in the prewar South
