

The Skin (Integumentary System)

Basic Structure of the Skin

1. The skin has three layers of complexity, and is often called the "three-layered cake" of the body. What are the three layers?

The three layers of the skin are the epidermis, dermis, and hypodermis. The epidermis is the outermost layer, the dermis is the middle layer, and the hypodermis is the innermost layer. The epidermis is composed of stratified squamous epithelium, the dermis is composed of dense irregular connective tissue, and the hypodermis is composed of adipose tissue.
