Banner,2014-08-15 This paper studies the lines of communications the Ho Chi Minh Trail which went from North to South Vietnam through Laos during the Second Indochina War The purpose of this paper is to study the proposal that the United States during the Vietnam War should have used ground forces in Laos to block these routes In providing background information this study examines the nature of the Ho Chi Minh Trail political and strategic considerations and US military actions which were applied against the trail network Studying the military feasibility of an interdiction effort on the ground this study finds that the US was physically capable of mounting an operation into Laos to block the Ho Chi Minh Trail The finding of this study is however that such a move would not by itself have provided a winning solution to the war Additionally such an attack into Laos would have had serious adverse consequences for that country and US desires for the region The conclusion of this study is that in this case the Second Indochina War a ground interdiction of enemy LOCs would not have been a productive course of action *Labour, British radicalism and the First World War* Lucy Bland,Richard Carr,2018-02-26 This book provides a concise set of thirteen essays looking at various aspects of the British left movements of protest and the cumulative impact of the First World War There are three broad areas this work intends to make a contribution to the first is to help us further understand the role the Labour Party played in the conflict and its evolving attitudes towards the war the second strand concerns the notion of work and particularly women s work the third strand deals with the impact of theory and practice of forces located largely outside the United Kingdom Through these essays this book aims to provide a series of thirteen bite size analyses of key issues affecting the British left throughout the war and to further our understanding of it in this critical period of commemoration Assessment of the BLM Exemption Request for Sales Ruled to Jeopardize the Northern Spotted Owl Brian Greber,1992 *Territorial Separatism in Global Politics* Damien Kingsbury,Costas

Laoutides,2015-03-05 This volume examines the various aspects of territorial separatism focusing on how and why separatist movements arise Featuring essays by leading scholars from different disciplinary perspectives the book aims to situate the question of separatism within the broader socio political context of the international system arguing that a set of historical events as well as local regional and global dynamics have converged to provide the catalysts that often trigger separatist conflicts In addition the book marks progress towards a new conceptual framework for the study of territorial separatism by linking the survival of communities in international politics with the effective control of territory and the consequent creation of new polities Separatist conflicts challenge conventional wisdom concerning conflict resolution within the context of international relations by unpacking a number of questions with regard to conflict transformation Through the use of case studies including Cyprus the Rakhine state in Myanmar the Shia separatism in Iraq the Uighurs in China and the case of East Timor the volume addresses key issues including the role of democracy international law intervention post conflict peacebuilding and the creation of new political entities The book will be of much interest to students of Intra State Conflict Resolution International Law Security Studies and International Relations *America Will be [kit].: America will be : teachers edition* ,1991 *Bulletin of the Atomic Scientists* ,1988-09 Evolutionary Psychology: Neuroscience Perspectives concerning Human Behavior and Experience William J. Ray,2013 This book brings together current perspectives concerning the manner in which human mind behavior and experience evolved In addition to the traditional psychological literature it draws from work in the cognitive and affective neurosciences ethology and genetics The focus will be on a unification and integration of evolutionary understandings within a broader consideration Religious Telescope ,1906

Bulletin of the Atomic Scientists ,1988-09 *On Obama* Paul C. Taylor,2015-10-23 On Obama examines some of the key philosophical questions that accompany the historic emergence of the 44th US president The purpose of this book is to take seriously the once common thought that the Obama presidency had ushered in a post historical age Three questions organize the argument of the book What s living and dead in the idea of post racialism Did Mr Obama s preference for problem solving over ideological warfare mark him not just as a post partisan figure but as a philosophical pragmatist Did the US become post imperial when the descendants of slaves and of British imperial subjects inhabited the White House In addition to taking up these questions the book considers Mr Obama s own relationship to the post historical idea and explores the ethical implications of certain ways of entertaining that idea *The American Reformer* ,1884 **An Alternative History of Bicycles and Motorcycles** Steven E. Alford,Suzanne Ferriss,2016-04-06 An Alternative History of Bicycles and Motorcycles Two Wheeled Transportation and Material Culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized Specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the Safety bicycle and the Einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling We argue that invention of these vehicles rather than the product

of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive The common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins Stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders Taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned By contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations We consider not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders The Oberlin Evangelist ,1841
