Rankings and the Reshaping of Higher Education E. Hazelkorn,2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation This book is the first comprehensive study of rankings from a global perspective making an important contribution to our understanding of the rankings phenomenon This book has also been published in Japanese

Place, Not Race Sheryll Cashin,2014-05-06 From a nationally recognized expert a fresh and original argument for bettering affirmative action Race based affirmative action had been declining as a factor in university admissions even before the recent spate of related cases arrived at the Supreme Court Since Ward Connerly kickstarted a state by state political mobilization against affirmative action in the mid 1990s the percentage of four year public colleges that consider racial or ethnic status in admissions has fallen from 60 percent to 35 percent Only 45 percent of private colleges still explicitly consider race with elite schools more likely to do so although they too have retreated For law professor and civil rights activist Sheryll Cashin this isn't entirely bad news because as she argues affirmative action as currently practiced does little to help disadvantaged people The truly disadvantaged black and brown children trapped in high poverty environs are not getting the quality schooling they need in part because backlash and wedge politics undermine any possibility for common sense public policies Using place instead of race in diversity programming she writes will better amend the structural disadvantages endured by many children of color while enhancing the possibility that we might one day move past the racial resentment that affirmative action engenders In Place Not Race Cashin reimagines affirmative action and champions place based policies arguing that college applicants who have thrived despite exposure to neighborhood or school poverty are deserving of special consideration Those blessed to have come of age in poverty free havens are not Sixty years since the historic decision we're undoubtedly far from meeting the promise of Brown v Board of Education but Cashin offers a new framework for true inclusion for the millions of children who live separate and unequal lives Her proposals include making standardized tests optional replacing merit based financial aid with need based financial aid and recruiting high achieving students from overlooked places among other steps that encourage cross racial alliances and social mobility A call for action toward the long overdue promise of equality Place Not Race persuasively shows how the social costs of racial preferences actually outweigh any of the marginal benefits when effective race neutral alternatives are available

Rising Above the Gathering Storm, Revisited Institute of Medicine,National Academy of Engineering,National Academy of Sciences,2005 "Rising Above the Gathering Storm" Committee,2010-09-23 In the face of so many daunting near term challenges U S government and industry are letting the crucial strategic issues of U S competitiveness slip below the surface Five years ago the National Academies prepared Rising Above the Gathering Storm a book that cautioned Without a renewed effort to bolster the foundations of our competitiveness we can expect to lose our

privileged position Since that time we find ourselves in a country where much has changed and a great deal has not changed So where does America stand relative to its position of five years ago when the Gathering Storm book was prepared The unanimous view of the authors is that our nation's outlook has worsened The present volume Rising Above the Gathering Storm Revisited explores the tipping point America now faces Addressing America's competitiveness challenge will require many years if not decades however the requisite federal funding of much of that effort is about to terminate Rising Above the Gathering Storm Revisited provides a snapshot of the work of the government and the private sector in the past five years analyzing how the original recommendations have or have not been acted upon what consequences this may have on future competitiveness and priorities going forward In addition readers will find a series of thought and discussion provoking factoids many of them alarming about the state of science and innovation in America Rising Above the Gathering Storm Revisited is a wake up call To reverse the foreboding outlook will require a sustained commitment by both individual citizens and government officials at all levels This book together with the original Gathering Storm volume provides the roadmap to meet that goal While this book is essential for policy makers anyone concerned with the future of innovation competitiveness and the standard of living in the United States will find this book an ideal tool for engaging their government representatives peers and community about this momentous issue

The Mathematical Sciences in 2025 National Research Council, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on the Mathematical Sciences in 2025, 2013-05-13 The mathematical sciences are part of nearly all aspects of everyday life the discipline has underpinned such beneficial modern capabilities as Internet search medical imaging computer animation numerical weather predictions and all types of digital communications The Mathematical Sciences in 2025 examines the current state of the mathematical sciences and explores the changes needed for the discipline to be in a strong position and able to maximize its contribution to the nation in 2025 It finds the vitality of the discipline excellent and that it contributes in expanding ways to most areas of science and engineering as well as to the nation as a whole and recommends that training for future generations of mathematical scientists should be reassessed in light of the increasingly cross disciplinary nature of the mathematical sciences In addition because of the valuable interplay between ideas and people from all parts of the mathematical sciences the report emphasizes that universities and the government need to continue to invest in the full spectrum of the mathematical sciences in order for the whole enterprise to continue to flourish long term

The Half-Opened Door Marcia Synnott, 2017-07-12 By the turn of the twentieth century academic nativism had taken root in elite American colleges specifically Harvard Yale and Princeton White Anglo Saxon Protestant hegemony was endangered by new kinds of student many of them Catholic and Jewish immigrants The newcomers threatened to displace native born Americans by raising academic standards and winning a disproportionate share of the scholarships *The Half Opened Door* analyzes the role of these institutions casting light on their place in class structure and values in the United States It details the origins history and demise of discriminatory admissions processes and depicts how the entrenched position of the upper class was successfully challenged The educational and hence economic mobility of Catholics and Jews has shown other groups for example African Americans Asian Americans and Spanish speaking Americans not only the difficulties that these earlier aspirants had in overcoming class and ethnic barriers but the fact that it can be done One of the ironies of the history of higher education in the United States is the use of quotas by admissions committees Restrictive measures were imposed on Jews because they were so successful whereas benign quotas are currently used to encourage underrepresented minorities to enter colleges and professional schools The competing claims of both the older and the newer minorities continue to be the subject of controversy editorial comments and court cases and will be for years to come

Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars

Count Girls In Karen Panetta, Katianne Williams, 2018-08-01 Maybe you have a daughter who loves cooking soccer and musicals Maybe she's a social butterfly an athlete a fashionista and a humanitarian who wants to change the world Be honest do you think Well she's clearly not a math and science kid Do you assume that certain classes and careers won't appeal to her *Count Girls In* challenges these assumptions and presents a totally different way of thinking there is a place for all girls and young women not just the science fair winners and robotics club members in science technology engineering and math STEM fields if we can keep their and our minds and options open and meet them where they are To succeed in STEM fields today girls don't have to change who they are A girl who combines her natural talents interests and dreams with STEM skills has a greater shot than ever before at a career she loves and a salary she deserves *Count Girls In* encourages parents and other adults to raise authentic young women who have the confidence to put STEM to work in a way that best serves them and their passions The authors both STEM professionals present compelling research in a conversational accessible style and provide specific advice and takeaways for each stage of schooling from elementary school through college followed by comprehensive STEM resources This isn't a book about raising competitive test-acing girls in lab coats this is about raising happy confident girls who realize the world of opportunities

before them High-Expectation Curricula Curt Dudley-Marling, Sarah Michaels, 2015-04-25 Despite growing evidence that all students will benefit from engaging and challenging instruction many struggling students continue to experience a circumscribed curriculum that emphasizes low level skills Featuring contributions from emerging and well known researchers this important volume is about the enactment of high expectation curricula in everyday practice Chapters document specific classroom strategies that make a difference in the learning of students from low socioeconomic backgrounds and cultural and linguistic minority communities While the book focuses on language and literacy instruction key chapters on math and science also demonstrate high expectation teaching across the curriculum Book Features A broad framework for creating high expectation curricula in underperforming K12 schools clear illustrations of what alternative literacy practices look like powerful examples of rich math and science instruction research based strategies for second language learners students with disabilities and struggling readers an incisive critique of the deficit driven curricula that dominates in underachieving schools and classrooms **The Urban School System of the Future** Andy Smarick, 2012-10-12 For more than two generations the traditional urban school system the district has utterly failed to do its job prepare its students for a lifetime of success Millions and millions of boys and girls have suffered the grievous consequences The district is irreparably broken For the sake of today s and tomorrow s inner city kids it must be replaced The Urban School System of the Future argues that vastly better results can be realized through the creation of a new type of organization that properly manages a city s portfolio of schools using the revolutionary principles of chartering It will ensure that new schools are regularly created that great schools are expanded and replicated that persistently failing schools are closed and that families have access to an array of high quality options This new entity will focus exclusively on school performance meaning among other things our cities can thoughtfully integrate their traditional public charter public and private schools into a single high functioning k 12 system For decades the district has produced the most heartbreaking results for already at risk kids The Urban School System of the Future explains how we can finally turn the tide and create dynamic responsive high performing self improving urban school systems that fulfill the promise of public education
