Choosing State Supreme Court Justices Greg Goelzhauser,2016-06-15 Since 1940 more than half of all states have switched at least in part from popular election or elite appointment to experiment with merit selection in choosing some or all of their state supreme court justices Under merit selection a commission often comprising some combination of judges attorneys and the general public is tasked with considering applications from candidates vying to fill a judicial vacancy Ostensibly the commission forwards the best candidates to the governor who ultimately appoints them Presently numerous states are debating whether to adopt or abolish merit selection In his short sharp book *Choosing State Supreme Court Justices* Greg Goelzhauser utilizes new data on more than 1 500 state supreme court justices seated from 1960 through 2014 to answer the question Does merit selection produce better types of judges He traces the rise of merit selection and explores whether certain judicial selection institutions favor candidates who have better qualifications are more diverse and have different types of professional experience Goelzhauser s results ultimately contribute to the broader debate concerning comparative institutional performance with respect to state judicial selection

Beyond Right and Wrong Randall Kiser,2010-01-07 Let us endeavor to see things as they are and then enquire whether we ought to complain Whether to see life as it is will give us much consolation I know not but the consolation which is drawn from truth if any there be is solid and durable that which may be derived from error must be like its original fallacious and fugitive Samuel Johnson Letter to Bennet Langton 1758 Attorneys and clients make hundreds of decisions in every litigation case From initially deciding which attorney to retain to deciding which witnesses to call at trial from deciding whether to file a complaint to deciding whether to appeal a verdict attorneys and clients make multiple critical decisions about strategies costs arguments valuations evidence and negotiations Once made these decisions are scrutinized by an opponent intent on exploiting the consequences of any mistake In this intense and adversarial arena decision making errors often are transparent irreversible and dispositive wielding the power to bankrupt clients and dissolve law firms Although attorneys and clients may regard sound decision making as incidental to effective lawyering sound decision making actually is the essence of effective lawyering An attorney s knowledge intelligence and experience are inert resources until the attorney decides how to deploy those skills to serve the client s interests Those decisions in turn largely determine a case s course and outcome

Breaking Ranks Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a

self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

The Trouble with Lawyers Deborah L. Rhode,2015-05-01 By any measure the law as a profession is in serious trouble Americans trust in lawyers is at a low and many members of the profession wish they had chosen a different path Law schools with their endlessly rising tuitions are churning out too many graduates for the jobs available Yet despite the glut of lawyers the United States ranks 67th tied with Uganda of 97 countries in access to justice and affordability of legal services The upper echelons of the legal establishment remain heavily white and male Most problematic of all the professional organizations that could help remedy these concerns instead jealously protect their prerogatives stifling necessary innovation and failing to hold practitioners accountable Deborah Rhode s The Trouble with Lawyers is a comprehensive account of the challenges facing the American bar She examines how the problems have affected and originated within law schools firms and governance institutions like bar associations the impact on the justice system and access to lawyers for the poor and the profession s underlying difficulties with diversity She uncovers the structural problems

from the tyranny of law school rankings and billable hours to the lack of accountability and innovation built into legal governance all of which do a disservice to lawyers their clients and the public The Trouble with Lawyers is a clear call to fix a profession that has gone badly off the rails and a source of innovative responses **Vault College Career Bible** ,2004 A job guide for college students Challenging the Internationalisation of Education Lucy Bailey,2023-07-07 This book presents a searing critique of the global take on education questioning why the idea that education should be international has come to dominate the field and positing that the discourse of internationalisation has altered the way we conceptualise education Using diverse examples from the Middle East the UK and South East Asia the book gathers insights from international schooling refugee education and the internationalisation of higher education to argue that the global gaze renders other ways of looking at education as invisible It suggests that an oversaturation of international comparison amongst individuals and institutions alike creates a culture of powerlessness exclusion and silencing Furthermore this volume also debates the issues that are caused when education is required to transcend national boundaries Ultimately questioning the global education system in its current form this book will be an important contribution for academics researchers and students in the fields of higher education education policy and politics and education and development more broadly **U S NEWS ULTIMATE COLLEGE DIRECTORY 2004** MCGRATH ANNE (EDITOR),2003 **Rankings and the Reshaping of Higher Education** E. Hazelkorn,2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation This book is the first comprehensive study of rankings from a global perspective making an important contribution to our understanding of the rankings phenomenon This book has also been published in Japanese *Black American Males in Higher Education* Henry T. Frierson,James H. Wyche,Willie PearsonJr.,2009-12-04 Part of the Emerald s Diversity in Higher Education series this volume presents discussions related to reports on research and theoretical views pertaining to Black males in higher education It also includes discussions of intervention programs within or associated with institutions of higher education Universities, Rankings and the Dynamics of Global Higher Education Hans Peter Hertig,2016-06-30 Global university rankings are now more than a decade old and this book uses the data they have produced to examine how the international landscape of universities has changed over the years It offers new insights into the power and limits of league tables a key element of globalized higher education that can be deplored but hardly ignored Case studies from Asia Europe and North America are explored to highlight the issues raised by a quantitative exercise that decontextualizes what is linked so strongly to local factors University Rankings Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal

logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

The Lawyer Bubble Steven J Harper, 2016-03-08 A noble profession is facing its defining moment From law schools to the prestigious firms that represent the pinnacle of a legal career a crisis is unfolding News headlines tell part of the story the growing oversupply of new lawyers widespread career dissatisfaction and spectacular implosions of pre eminent law firms Yet eager hordes of bright young people continue to step over each other as they seek jobs with high rates of depression life consuming hours and little assurance of financial stability The Great Recession has only worsened these trends but correction is possible and now imperative In *The Lawyer Bubble* Steven J Harper reveals how a culture of short term thinking has blinded some of the nation s finest minds to the long run implications of their actions Law school deans have ceded independent judgment to flawed U S News World Report rankings criteria in the quest to maximize immediate results Senior partners in the nation s large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions Yet wiser decisions being honest about the legal job market revisiting the financial incentives currently driving bad behavior eliminating the billable hour model and more can take the profession to a better place A devastating indictment of the greed shortsightedness and dishonesty that now permeate the legal profession this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again

The View from the Bench and Chambers Jennifer Barnes Bowie, Donald R. Songer, John Szmer, 2014-10-30 For most of their history the U S courts of appeals have toiled in obscurity well out of the limelight of political controversy But as the number of appeals has increased dramatically while the number of cases heard by the Supreme Court has remained the same the courts of appeals have become the court of last resort for the vast majority of litigants This enhanced status has been recognized by important political actors and as a result appointments to the courts of appeals have become more and more contentious since the 1990s This combination of increasing political salience and increasing political controversy has led to the rise of serious empirical studies of the role of the courts of appeals in our legal and political system At once building on and contributing to this wave of scholarship *The View from the Bench and Chambers* melds a series of quantitative analyses of judicial decisions with the perspectives gained from in depth interviews with the judges and their law clerks This multifaceted approach yields a level of insight beyond that provided by any previous work on appellate courts in the United States making *The View from the Bench and Chambers* the most comprehensive and rich account of the operation of these courts to date

A Perfect Mess David F. Labaree, 2017-04-21 A history of higher education in America and an investigation into the secrets of its

success A Perfect Mess should become a classic Times Higher Education Read about America's colleges and universities rising student debt affirmative action debates conflicts between faculty and administrators and it's clear that higher education in this country is a total mess But as David F Labaree reminds us in this book it's always been that way And that's exactly why it has become the most successful and sought after source of learning in the world Detailing American higher education's unusual struggle for survival in a free market that never guaranteed its place in society a fact that seemed to doom it in its early days in the nineteenth century he tells a lively story of the entrepreneurial spirit that drove American higher education to become the best And the best it is today America's universities and colleges produce the most scholarship earn the most Nobel prizes hold the largest endowments and attract the most esteemed students and scholars from around the world But this was not an inevitability In their early years weakly funded American schools had to rely on student tuition and alumni donations to survive This gave them tremendous autonomy to seek out sources of financial support and pursue unconventional opportunities As Labaree shows by striving mightily to meet social needs and fulfill individual ambitions they developed a broad base of political and financial support that grounded by large undergraduate programs allowed for the most cutting edge research and advanced graduate study ever conducted As a result American higher education eventually managed to combine a unique mix of the populist the practical and the elite in a single complex system The answers to today's problems in higher education are not easy but as this book shows they shouldn't be No single person or institution can determine higher education's future It is something that faculty administrators and students adapting to society's needs will determine together just as they have always done

Managing the Entrepreneurial University J. Douglas Toma, 2011-06-06 Managing the Entrepreneurial University is essential reading for both higher education administrators and those studying to enter the field As universities have become more market focused they have changed dramatically But has the law kept up This book explains fundamental legal concepts in clear non technical language and grounds them in practical management situations indicating where doctrines and standards have evolved identifying where legal difficulties may be more likely to arise and suggesting where change may be merited In its chapters on process discrimination employment students and regulation the book Provides lively case studies applicable to every type of institution Includes a simulation exercise at the end of each chapter for use in teaching or training Draws on an over 550 source bibliography A hypothetical case spans each chapter addressing not only research universities and elite liberal arts colleges but also community colleges small private colleges and regional comprehensive universities Readers working across functional areas and at various institution types will find the book directly relevant in clarifying and deepening their understanding of the legal environment associated with their responsibilities within the entrepreneurial university
