Prompt:

Tell us about a talent, quality, contribution experience or accomplishment that is very important to you. What about it makes you very proud and how has it molded you as a person?

I am currently an Internet entrepreneur. Since the age of 10, I have taught myself coding and design of websites. Our local community has asked me to create a homepage for a club, while I have also made websites for my school. As a hobby and pastime, I love visiting websites and getting good ideas that I can implement on my own projects.

Because of this, I was able to start my own business in 2005, providing freelance services in creating websites. However, being 'unprofessional' at that, I need to learn more. I know that I need to have formal training in order to be able to provide services that are trustworthy and reliable. While preparing for this, I applied as a webmaster under Intel Corporation, and was hired this last summer. There I learned more things, but I know that only formal education training would give me all the confidence I need in order to create a business on my own; one that will not only showcase my skills, but will also serve its purpose accordingly.

During my free time, I volunteer my time in running the website at the service club at my high school. My passion in learning more about Internet Technology all started as curiosity but it has eventually evolved into something that made me dream of what I want to be in the future. I already taught myself some of the most basic programming languages. I believe that with the education I will get in your university, I will not just learn more, but also learn to understand the concept behind IT more and associate with fellow students as well. I believe that this is necessary for me to thrive in the real world.
