Beginning Software Engineering Rod Stephens,2022-10-14 Discover the foundations of software engineering with this easy and intuitive guide In the newly updated second edition of Beginning Software Engineering expert programmer and tech educator Rod Stephens delivers an instructive and intuitive introduction to the fundamentals of software engineering In the book you ll learn to create well constructed software applications that meet the needs of users while developing the practical hands on skills needed to build robust efficient and reliable software The author skips the

unnecessary jargon and sticks to simple and straightforward English to help you understand the concepts and ideas discussed within. He also offers you real world tested methods you can apply to any programming language. You'll also get Practical tips for preparing for programming job interviews which often include questions about software engineering practices. A no nonsense guide to requirements gathering, system modeling, design, implementation, testing and debugging. Brand new coverage of user interface design, algorithms and programming language choices. Beginning Software Engineering doesn't assume any experience with programming development or management. It's plentiful figures and graphics help to explain the foundational concepts and every chapter offers several case examples. Try It Out and How It Works explanatory sections. For anyone interested in a new career in software development or simply curious about the software engineering process. Beginning Software Engineering Second Edition is the handbook you've been waiting for.

Near Field Communication (NFC) Vedat Coskun, Kerem Ok, Busra Ozdenizci, 2012-02-13 This book provides the technical essentials, state of the art knowledge, business ecosystem and standards of Near Field Communication (NFC) by NFC Lab Istanbul research centre which conducts intense research on NFC technology. In this book, the authors present the contemporary research on all aspects of NFC, addressing related security aspects as well as information on various business models. In addition, the book provides comprehensive information a designer needs to design an NFC project, an analyzer needs to analyze requirements of a new NFC based system and a programmer needs to implement an application. Furthermore, the authors introduce the technical and administrative issues related to NFC technology standards and global stakeholders. It also offers comprehensive information as well as use case studies for each NFC operating mode to give the usage idea behind each operating mode thoroughly. Examples of NFC application development are provided using Java technology and security considerations are discussed in detail. Key Features: Offers a complete understanding of the NFC technology including standards, technical essentials, operating modes, application development with Java, security and privacy, business ecosystem analysis. Provides analysis, design as well as development guidance for professionals from administrative and technical perspectives. Discusses methods, techniques and modelling support including UML, are demonstrated with real cases. Contains case studies such as payment, ticketing, social networking and remote shopping. This book will be an invaluable guide for business and ecosystem analysts, project managers, mobile commerce consultants, system and application developers, mobile developers and practitioners. It will also be of interest to researchers, software engineers, computer scientists, information technology specialists including students and graduates.

Relating Software Requirements and Architectures Paris Avgeriou, John Grundy, Jon G. Hall, Patricia Lago, Ivan Mistrík, 2011-08-03 Why have a book about the relation between requirements and software architecture? Understanding the relation between requirements and architecture is important because the requirements, be they explicit or implicit, represent the function, whereas the architecture determines the form. While changes to a set of requirements may impact on the realization of the architecture, choices made for an architectural

solution may impact on requirements e.g. in terms of revising functional or non functional requirements that cannot actually be met. Although research in both requirements engineering and software architecture is quite active, it is in their combination that understanding is most needed and actively sought. Presenting the current state of the art is the purpose of this book. The editors have divided the contributions into four parts. Part 1: Theoretical Underpinnings and Reviews addresses the issue of requirements change management in architectural design through traceability and reasoning. Part 2: Tools and Techniques presents approaches, tools and techniques for bridging the gap between software requirements and architecture. Part 3: Industrial Case Studies then reports industrial experiences while part 4: on Emerging Issues details advanced topics such as synthesizing architecture from requirements or the role of middleware in architecting for non functional requirements. The final chapter is a conclusions chapter identifying key contributions and outstanding areas for future research and improvement of practice. The book is targeted at academic and industrial researchers in requirements engineering or software architecture. Graduate students specializing in these areas as well as advanced professionals in software development will also benefit from the results and experiences presented in this volume.

Intelligent Computing Techniques and Applications Tusharkanta Samal, Ambarish Panda, Manas Ranjan Kabat, Ali Ismail Awad, Suvendra Kumar Jayasingh, Deepak K Tosh, 2025-08-19. This Taylor Francis CRC Press volume contains the papers presented at the International Conference on Emerging Trends in Intelligent Computing Techniques (ICETICT) 2024 held during 27th and 28th December 2024, organized by DRIEMS University, Tangi, Cuttack, Odisha, India. A lot of challenges at us and no words of appreciation is enough for the organizing committee who could still pull it off successfully. The conference draws the excellent technical keynote talk and many papers. The keynote talks by Prof. Sanjeevikumar Padmanaban, University of South Eastern Norway and Prof. Bidyadhar Subudhi, Director, NIT Warangal, are worth mentioning. We are grateful to all the speakers for accepting our invitation and sparing their time to deliver the talks.
