Braden,2019-07-12 Historical environments delight visitors because of their ability to make them feel transported to another time and place These

Sewell,2023-08-01

**INFINITY IS NOT WHAT IT SEEMS** Infinity is commonly assumed to be a logical concept reliable for conducting mathematics describing the Universe and understanding the divine Most of us are educated to take for granted that there exist infinite sets of numbers that lines contain an infinite number of points that space is infinite in expanse that time has an infinite succession of events that possibilities are infinite in quantity and over half of the world s population believes in a divine Creator infinite in knowledge power and benevolence According to this treatise such assumptions are mistaken In reality to be is to be finite The implications of this assessment are profound the Universe and even God must necessarily be finite The author makes a compelling case against infinity refuting its most prominent advocates Any defense of the infinite will find it challenging to answer the arguments laid out in this book But regardless of the reader s position *Forever Finite* offers plenty of thought provoking material for anyone interested in the subject of infinity from the perspectives of philosophy mathematics science and theology **Historical Outlook** ,1926 *The Politics of Speed* Simon Glezos,2013-03-01

Everyone agrees that the world is accelerating With advances in communication transportation and information processing technologies it is clear that the pace of events in global politics is speeding up at an alarming rate The implications of this new speed however continue to be a significant source of debate Will acceleration lead to a more interconnected productive peaceful and humane world or a nightmarish descent into ecological devastation economic exploitation and increasingly

violent warfare The Politics of Speed attempts to map the contours of the new global space of speed and investigates key issue areas including democratic governance warfare capitalism globalization and transnational activism to uncover the ways in which acceleration is shaping the world The book uses contemporary political theory especially the works of Deleuze and Guattari to develop an ontological account of speed showing how its effects are frequently far more complex and surprising than we might expect The result is an attempt to craft a way of engaging with global acceleration that might help avoid the dangers of speed while embracing the possibilities it provides us with to produce a safer more egalitarian democratic and pluralistic world *Narratives of African American Women's Literary Pragmatism and Creative Democracy* Gregory Phipps,2018-11-02

This book charts an interdisciplinary narrative of literary pragmatism and creative democracy across the writings of African American women from the works of nineteenth century philosophers to the novels and short stories of Harlem Renaissance authors The book argues that this critically neglected narrative forms a genealogy of black feminist intersectionality and a major contribution to the development of American pragmatism Bringing together the philosophical writings of Maria Stewart Anna Julia Cooper and Mary Church Terrell and the fictional works of Jessie Fauset Nella Larsen and Zora Neale Hurston this text provides a literary pragmatist study of the archetypes tropes settings and modes of resistance that populate the narrative of creative democracy Above all this book considers how these philosophers and authors construct democracy as a lived experience that gains meaning not through state institutions but through communities founded on relationships among black women and their shared understandings of culture knowledge experience and rebellion

**The Undiscovered Mind** John Horgan,2000-11-14 A respected journalist explores the fields of science that try to explain the mysteries of the human mind arguing that science has done little to plumb the depths of our minds and cannot ever rationally explain all of human behavior *Elites* Murray Milner, Jr.,2015-01-08

At a time when significant social status economic resources and political opportunities seem to become ever more unequally distributed and only available to a few this book represents the first systematic effort in recent years to develop a sociological model of elites and non elites In outlining a new typology of economic political and cultural elites as well as drawing attention to the important role of non elites this accessibly written book provides novel insights into the structure of historical and contemporary societies Milner identifies the sources and structures of economic political and cultural power and investigates patterns of cooperation and conflict between and within elite groups Analyzing politicians and propagandists landowners and capitalists national heroes and celebrities ordinary folks and outcasts the book applies its model to three distinctly different societies ancient India Classical Athens and the contemporary United States highlighting important structural commonalities across these otherwise very dissimilar societies A significant contribution to scholarship *Elites* will also be useful for an array of courses in sociology political science and history **Abortion Care** Sam Rowlands,2014-08-28

Race, Time, and Utopia William M. Paris,2024 Racial injustice at its core is the domination of time Utopia has been one response to this domination The racially dominated are not free to define what counts as progress they are not free from the accumulation of past injustices and most importantly they are not free from the arbitrary organization of work in capitalist labor markets Racially unjust societies are forms of life where the justifications for how to organize time around life labor and leisure are out of the hands of the dominated In *Race Time and Utopia* William Paris provides a theoretical account of utopia as the critical analysis of the sources of time domination and the struggle to create emancipatory forms of life Rather than focusing on inclusion and equality before the law as found in liberal theories of racial injustice Paris analyses the neglected

utopian tradition of justice in black political thought that insists justice can only be secured through the transformation of society as a whole This transformation is nothing less than the democratic transformation of how organize and narrate our shared time Bringing into conversation the work W E B Du Bois Martin Delany Marcus Garvey Frantz Fanon and James Boggs with the critical theory of Karl Marx Ernst Bloch Rahel Jaeggi and Rainer Forst Paris reconstructs a social theory and normative account of forms of life as the struggle over how time will be organized asking Can there be freedom without a new order of time      **Oxford Textbook of Global Public Health** Roger Detels, Martin Gulliford, Quarraisha Abdool Karim, Chorh Chuan Tan, 2017 Sixth edition of the hugely successful internationally recognised textbook on global public health and epidemiology comprehensively covering the scope methods and practice of the discipline
