University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties **U. **Crafting a Class** Elizabeth A. Duffy, Idana Goldberg, 2014-07-14 Admissions and financial aid policies at liberal arts colleges have changed dramatically since 1955 Through the 1950s most colleges in the United States enrolled fewer than 1000 students nearly all of whom were white Few colleges were truly selective in their admissions they accepted most students who applied In the 1960s as the children of the baby boom reached college age and both federal and institutional financial aid programs expanded many more students began to apply to college For the first time liberal arts colleges were faced with an abundance of applicants which raised new questions What criteria would they use to select students How would they award financial aid The answers to these questions were shaped by financial and educational considerations as well as by the struggles for civil rights and gender equality that swept across the nation The colleges answers also proved crucial to their futures as the years since the mid 1970s have shown When the influx of baby boom students slowed colleges began to recruit aggressively in order to maintain their class sizes In the past decade financial aid has become another tool that colleges use to compete for the best students By tracing the development of competitive admission and financial aid policies at a selected group of liberal arts colleges *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic economic political and social forces Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio At each college they not only collected empirical data on admissions enrollment and financial aid trends but they also examined archival materials and interviewed current and former administrators Duffy and Goldberg have produced an

authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**Multidimensional Ranking** Frans A. van Vught, Frank Ziegele, 2012-02-22 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and critized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and user driven ranking tool called U Multirank U Multirank is the outcome of a pilot project sponsored by the European Commission in which the new ranking instrument was designed and tested at a global scale

*Planning the Development of Builders, Leaders and Managers for 21st-Century Business: Curriculum Review at Columbia Business School* N. Capon, 2012-12-06 Business and management education has an important impact on business practice throughout the world To a very large extent possession of the MBA degree is a passport into the upper reaches of management and CEOs of many major corporations have earned an MBA It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made The heart of the MBA education is the curriculum and curriculum design is perhaps the most important strategic function for a business school faculty to undertake In order to understand the many issues concerning this contemporary curriculum review this book examines three related contextual domains First it details the long term growth of business and management education Second it examines the major theoretical and empirical literatures on organizational evolution and decision making paying special attention to decision making in institutions of higher education Finally the book describes the previous major curriculum review at

Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992 This book demonstrates what can be achieved by an institution that sets high standards for its business education and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula In addition it provides a prime example of curriculum design effort in one of the leading institutions worldwide Finally it will be of interest to scholars in several different fields notably higher education curriculum review organizational decision making and long run organizational evolution      Access and Expansion Post-Massification Ben Jongbloed,Hans Vossensteyn,2015-12-14 This edited collection addresses the crucial issues emerging from the ongoing expansion of higher education focusing on how national systems of higher education can respond further expand when traditional routes to have been largely exhausted      Ranking Obsession Culture Sienna Vance,AI,2025-04-07 Ranking Obsession Culture examines the pervasive influence of rankings on legal education impacting student choices and institutional behavior It explores how the pursuit of higher rankings affects where students choose to attend law school and how law schools allocate resources The book uniquely combines law economics psychology and sociology to provide a multifaceted understanding of this phenomenon The book delves into the psychological impact of rankings on prospective students revealing how perceptions of prestige can drive decisions and analyzes how law schools strategically adapt admissions practices to improve their ranking position It also addresses the potential distortions caused by a singular focus on metrics such as a diminished emphasis on teaching quality The text unfolds by first introducing the history of ranking systems then examining the psychological factors driving student fixation and finally exploring the ethical implications of ranking driven behavior The book offers a critical perspective on the role of rankings in shaping decisions within the legal education market By connecting to broader themes in higher education policy organizational behavior and sociology it provides insights relevant to other professional fields This analysis challenges assumptions made by students faculty and administrators advocating for a more holistic understanding of institutional value and the need for comprehensive assessment methods beyond just rankings      Who Goes to America's Highly Ranked "national" Universities? Jeffrey A. Owings,Timothy Madigan,Bruce Daniel,1998      Study in America: The Definitive Guide for Aspiring Students Rao, Renuka Raja,2009 Study in America The Definitive Guide for Aspiring Students is a comprehensive handbook that addresses the specific needs of students aspiring to go to the USA for higher studies It provides step by step advice on the application process the tests required choosing universities writing application essays obtaining financial aid and the all important process of obtaining a U S visa Unique vocabulary used in U S campuses anecdotes and real life examples have also been discussed
