An Insider's Guide to Academic Medicine David C. Aron,2023-02-11 This book serves as an insider s guide to careers in academic medicine The author shares his 45 years of experience as a clinician teacher researcher and administrator His journey has often taken unpredictable turns and the book offers practical guidance to becoming a successful physician scientist in academic medicine or to become a successful clinician affiliated with an academic medical center Divided into four parts the book begins by focusing on academic medicine as a complex system This is followed by parts on academic duties academic life and concludes with words of wisdom These sections and subsequent chapters are tied together by the scholarships of discovery teaching application and integration To pursue research practice teaching and administration scholarship should be the core value of every physician **The Meritocracy Trap** Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the

country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

tax dollars are going to fund higher education If corporations kick in a little more should they be able to dictate the research or own the discoveries During the past two decades commercial forces have quietly transformed virtually every aspect of academic life Corporate funding of universities is growing and the money comes with strings attached In return for this funding universities and professors are acting more and more like for profit patent factories university funds are shifting from the humanities and the less profitable science departments into research labs and the skill of teaching is valued less and less Slowly but surely universities are abandoning their traditional role as disinterested sources of education alternative perspectives and wisdom This growing influence of corporations over universities affects more than just today s college students and their parents it compromises the future of all those whose careers depend on a university education and all those who will be employed governed or taught by the products of American universities

U.S. News and World Report ,2007 The Slippery Slope of Healthcare Steven Z. Kussin,2020-03-24 Dr Steven Kussin physician and a pioneer in the Shared Decision movement takes readers

through the steps of how to avoid the many pitfalls of unnecessary and sometimes even dangerous medical care The American healthcare system is subsidized by its services to healthy people The goal as it is for any business is to encourage people to become consumers by creating an emotionally fueled demand for things that are suddenly and urgently needed It s hard to make healthy people well it s easy to make them sick Under the goal to make you even healthier the medical industry identifies and encourages investigations and preventive technologies for problems unlikely to occur unlikely to harm unlikely to benefit from testing and once diagnosed unlikely to benefit from treatment Profitable services go on indefinitely for those who are young and well For the health care industry being in good health is not just the best way to live good health is also the slowest way to die Many people find themselves on what the author calls the Slippery Slope experiencing a cascade of escalating misfortunes produced by more tests with incrementally greater risk expense and fewer benefits Many people who in the attempt to improve what is already just fine unquestioningly pay an immediate and visible price for what are distant invisible and uncertain benefits The central starting point for initiating a Slippery Slope adventure can be the first blood test the first screening test the first x ray the first pill or the first diagnosis that s accepted by unwitting and trusting consumers The bottom of the Slippery Slope is occupied by those previously well but who now are damaged and by others who suffered needless unscheduled deaths America s famed consumer skepticism when judging retail products is curiously and

dangerously absent in their interactions within the healthcare system Here Steven Kussin offers strategies that give readers knowledge and power by offering unique perspectives information and resources He confronts the mighty forces arrayed against health care consumers and helps readers learn to identify them themselves The power of money the authority of science the stature of physicians the lure of elective health improvements the promise of technology and the pitch perfect perfect pitches of televised ads all conspire to push people in directions that are often at odds with their stated priorities and interests This book is dedicated to one lesson The view from atop the Slope before making a health care decision is better than the view from the bottom after having made a bad one For more information visit <https://theslipperrslopebook.com>
