Trump, Eric T. Rosenthal,2021-10-11 A 2022 Choice Reviews Outstanding Academic Title An important history of the development of cancer centers of excellence and the revolution in cancer treatment In the 1960s a coalition of concerned citizens scientists and politicians joined forces to convince the federal government to focus its efforts on conquering cancer The National Cancer Act of 1971 resulted and was signed into law on December 23 1971 by President Nixon The national War on Cancer was declared with some leaders naively arguing that the disease would be conquered by the nation s bicentennial a mere five years in the future Over the next five decades scientific discoveries demonstrated the great complexity of what had formerly been thought of as a single disease with the advent of the genetic characterization of cancers it is now recognized that there are almost an infinite number of cancers as defined by their many genetic mutations The National Cancer Act established the infrastructure for the designation of centers by the National Cancer Institute NCI and these centers have evolved into models of multidisciplinary collaborative cancer research treatment and prevention contributing to a reduction in cancer mortality and increase in quality of life and survival that has translated into more than 17 million cancer survivors in the United States in 2021 *Centers of the Cancer Universe A Half Century of Progress Against Cancer* tells the story of how cancer research was

not front and center at most universities and research institutions before the National Cancer Act of 1971 and why many physicians were reluctant even to treat patients with cancer in the early 20th century It follows the behind the scenes lobbying resistance and negotiating that preceded signing the Act into law and how the cancer centers of today came to fruition and shaped how cancer research clinical trials and treatment would be conducted *Cancer Michelangelo Delfino*, Mary E. Day, 2006 This is a book about radiation oncology a study of cancer and the role radiation plays in its development diagnosis and treatment This book explores radiation as both a killer and a healer by introducing the reader to the effect of radiant energy on the body and the way radiation is harnessed to both diagnose and eradicate cancer After introducing the tools used for diagnosis and treatment a brief explanation is given on how cancer is measured using staging and statistics Who gets cancer and the risk factors for each particular cancer are briefly described with comparisons made between the United States Canada Japan and the U K Cancers are then individually described and grouped somewhat arbitrarily by body site and function The discussions of each cancer include summaries of key trials and recent studies of modern treatment options by stage focusing on the efficacy of radiotherapy and its associated risks with comparisons to alternative therapies such as surgery and chemotherapy Each chapter concludes with practical evaluations of the best treatment with an emphasis on quality of life The use of radiation for palliation and treating other diseases is also described This work is written with the patient the family the friends and the caregivers in mind for the purpose of providing a quick reference for making informed choices Knowledge of science is not necessary as concepts are defined in simple terms and easy access is provided for important information such as cancer staging cancer statistics radiography and radiotherapy tools radiotherapy techniques and radionuclides used in brachytherapy For those interested in further research original works are referenced and an index and glossary are included **Insiders' Guide® to Houston, 2nd** Laura

Beating Hearts Sherry F. Colb,Michael C. Dorf,2016-03-08 How can someone who condemns hunting animal farming and animal experimentation also favor legal abortion which is the deliberate destruction of a human fetus The authors of Beating Hearts aim to reconcile this apparent conflict and examine the surprisingly similar strategic and tactical questions faced by activists in the pro life and animal rights movements Beating Hearts maintains that sentience or the ability to have subjective experiences grounds a being's entitlement to moral concern The authors argue that nearly all human exploitation of animals is unjustified Early abortions do not contradict the sentience principle because they precede fetal sentience and Beating Hearts explains why the mere potential for sentience does not create moral entitlements Late abortions do raise serious moral questions but forcing a woman to carry a child to term is problematic as a form of gender based exploitation These ethical explorations lead to a wider discussion of the strategies deployed by the pro life and animal rights movements Should legal reforms precede or follow attitudinal changes Do gory images win over or alienate supporters Is violence ever principled By probing the connections between debates about abortion and animal rights Beating Hearts uses each highly contested set of questions to shed light on the other **Congressional Record** ,
