

7th Grade Research Paper/Project Ideas and Booklet Information

Throughout the multi-week construction period, each seventh grade student will be required to work on and complete a research paper/project, which will be one part of a science competition booklet. If they are working as part of the team they may turn in a single project but both students are expected to contribute to the final project. The booklet must include final blueprints of their project and will be worth the equivalent of one test grade. The specific requirements are listed below. The bulk of the research needs to be completed at home, although if a student finishes building her competition project before the allotted time has elapsed, she may work on her booklet during class. The paper/project needs to be on a topic that is relevant to the science competition project being constructed. Some suggestions for research topics are listed below. The booklet is due the Friday after the science competition on May 6th.

Possible Research Topics for Individual Projects:

1. **Glider:** 1) A description of aerodynamics or aeronautical engineering. 2) The evolution of flying machines. 3) The history and science of flight. 4) Research NASA missions.
2. **Egg Drop:** 1) Discuss the recycling process or specifically the recycling process of paper (what percentage of paper or other materials are recycled, what happens to recycled paper or other materials, etc.). 2) Discuss natural resources, what is a natural resource, how is it acquired, is there an unlimited supply? 3) Use of cotton and natural fibers vs. synthetic materials in clothing. Are there advantages or disadvantages to one or the other?
3. **Kite Building:** 1) Research and discuss different types of kite models. Are there advantages or disadvantages to specific designs? 2) How long have kites been around and what cultures were the earliest users? 3) Have kites been used for anything other than recreational purposes?

Department of Public Instruction, 1927. The Art of Teaching Science Jack Hassard, Michael Dias, 2013-07-04. The Art of Teaching Science emphasizes a humanistic, experiential, and constructivist approach to teaching and learning and integrates a wide variety of pedagogical learning tools. These tools involve inquiry and experimentation, reflection through writing and discussion, as well as experiences with students, science curriculum, and pedagogy. Becoming a science teacher is a creative process, and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers, professionals, and instructors, and through hands-on activities designed to foster a collaborative, thoughtful learning environment. Resources in Education, 1997. **Educational Research Bulletin**, 1929. Includes the sections Educational readings and Books to read. Handbook of Research on Science Teaching and Learning Dorothy Gabel, 1994. Sponsored by the National Science Teachers Association, this handbook provides a uniquely comprehensive and current survey of the best research in science education compiled by the most renowned researchers. More than summaries of findings, the content provides an assessment of the significance of research, evaluates new developments, and examines current conflicts, controversies, and issues in the major science disciplines: biology, chemistry, physics, and earth science. Research Adventures in University Teaching Sidney Leavitt, Pressey, 1927. **The Development of Teaching Expertise from an International Perspective** Su Liang, 2013-06-01. This book provides an insightful view of effective teaching practices in China from an international perspective by examining the grades 7-12 mathematics teacher preparation in the Shandong province of China. It is an excellent reference book for teacher educators, researchers, reformers, and teaching practitioners. A qualitative research approach involving in-depth interviews with purposive sampling of ten grades 7-12 award-winning mathematics teachers was chosen to conduct the study. The participants are from the Shandong province and have been awarded recognition for his/her achievements in teaching grades 7-12 mathematics by the different levels: school, district, city, province, or nation, and his/her students have achieved high average scores in college entrance exams or in high school entrance exams among the classes at the same grade level. Data

analysis revealed the following findings first grades 7 12 mathematics teachers from the Shandong province of China were prepared to teach through pre service training in service training and informal learning The pre service training can be characterized as emphasizing formal mathematics training at advanced level The in service training is integrated with teacher collaboration and teaching research and has the characteristics of diversity continuity and orientation toward teaching practice The in service training also stimulates teachers to conduct self directed learning Second the award winning grades 7 12 mathematics teachers are identified by the following characteristics they are passionate about mathematics and share their passion through teaching they actively take part in teaching research through application of teaching research in the classroom collaboration with peers and systematic lesson preparation they apply technology into teaching and they take an active role in teaching research in order to expand their professional opportunities Based on the findings of this study the following conclusions were reached pre service training and in service training are both necessary processes for mathematics teachers to build up their knowledge base for effective teaching Pre service training is just a starting point for the teaching profession In service training integrated with teacher collaboration and teaching research should be a continuous activity that is a part of a teacher s everyday life **Religion in the Classroom** Jonathan M. Golden, Joseph J.

McCallister, 2023-09-21 An indispensable resource for understanding religion s place in American schools and in matters concerning the separation of church and state in the United States There are few places where the tension between freedom of religion and separation of church and state is more salient than in America s public schools This book serves as a point of reference for many of the most important instances of this tension including the court cases laws and legal documents policies and principles involved Approximately 50 reference entries are included covering topics such as the American Civil Liberties Union school dress code and the Scopes Trial The entries provide cross references and suggestions for further reading and the volume closes with an annotated bibliography **Research It! Write It!** Diana Barnett, 1997 This concise guide covers selecting a topic doing research organizing facts documenting sources developing content and writing an effective report
