

Meet the Teacher!

Welcome to first grade! I'm Mr. Bacher and I am so happy to meet you! I know this is going to be a great year for all of us to grow and learn together.

Before I became a full time teacher, I was a teaching artist, actor, comedian, and puppeteer. I also work at Camp Liberty here in Jersey City during the summer teaching magic, comedy and puppetry.

I have had the wonderful opportunity to travel quite a bit with all the many things I have been involved in. I have been overseas, and have been to every state in the U.S.A., except for six of them. (You'll have to ask me which ones I'm missing!)

We are going to learn so many great things this year, and I am looking forward to every minute of it!

These are a few of my favorite things:

Movie: The Pink Panther Strikes Again

T.V. Show: Gilligan's Island

Music: Big Band, Dixieland, Jazz

Author: Michael Crichton

Osborn, 2003-10-30 The Language Teachers

s Portfolio A Guide for Professional Development is written for use by both preservice and inservice teachers. It links elements of educational practice and theory that students of education frequently find difficult to assimilate in language teaching. This text purposefully integrates material such as foundations of education, educational psychology, elements of planning and lesson preparation, reflective teaching, and classroom management issues into the reality of the language classroom. Thus students of world language education are provided a holistic perspective of the challenges required to bring what may seem to be disjointed theoretical information into workable elements of classroom practice. Teacher educators can utilize this text to guide students to use the portfolio as an assessment tool or a project for an instructional development class. The material in the text is designed so that students are able to rely on the text to guide them in preparing many elements of a portfolio, thus freeing educators to devote more classroom time to other topics. It is also useful for programs that have a portfolio as an exit requirement and for teachers who plan to use the portfolio to document their professional development.

Handbook of Instructional Practices for Literacy Teacher-educators Joyce E. Many, 2001-01-01. This volume offers a unique glimpse into the teaching approaches and thinking of a wide range of well-known literacy researchers and the lessons they have learned from their own teaching lives. The contributors teach in a variety of universities, programs, and settings. Each shares an approach he or she has used in a course and introduces the syllabus for this course through personal reflections that give the reader a sense of the theories, prior experiences, and influential authors that have shaped their own thoughts and approaches. In addition to describing the nature of their students and the program in which the course is taught, many authors also share key issues with which they have grappled over the years while teaching their course. Others discuss considerations that were relevant during the preparation of this particular syllabus or describe how it evolved in light of student input. The book is organized by areas within literacy education: reading, English language arts, literature, emergent literacy, content area literacy, literacy assessment and instruction, literacy and technology, and inquiries into literacy theory and classroom practice. It is accompanied by an interactive Web site: <http://msit.gsu.edu/handbook>. This online resource provides additional information about the authors' courses, including complete syllabi, recommended readings, grading rubrics, and sample assignments. Readers are invited to respond and contribute their own syllabi and teaching experiences to the discourse generated by the volume.

Teacher Skills and Strategies Peter Woods, 1990. Presents a general model of teaching which encompasses both social aspects of teaching skills and coping strategies more concerned with survival and self. The book has particular import in the aftermath of the Education Reform Act.

Preparing Pre-Service Teachers to Teach Computer Science Chrystalla Mouza, Aman Yadav, Anne Ottenbreit-Leftwich, 2021-05-01. Computer science has emerged as a key driver of innovation in the 21st century. Yet preparing teachers to teach computer science or integrate computer science content into K-12 curricula remains an enormous challenge. Recent policy reports have suggested the need to prepare future teachers to teach computer science through pre-service teacher education programs. In order to prepare a generation of teachers who are capable of delivering computer science to students, however, the field must identify research-based examples, pedagogical strategies, and policies that can facilitate changes in teacher knowledge and practices. The purpose of this book is to provide examples that could help guide the design and delivery of effective teacher preparation on the teaching of computer science. This book identifies promising pathways, pedagogical strategies, and policies that will help teacher education faculty and pre-service teachers infuse computer science content into their curricula as well as teach stand-alone computing courses. Specifically, the book focuses on pedagogical practices for developing and assessing pre-service teacher knowledge of computer science, course design models for pre-service teachers, and discussion of policies that can support the teaching of computer science. The primary audience of the book is students and faculty in educational technology, educational or cognitive psychology, learning theory, teacher education curriculum and instruction, computer science, instructional systems, and learning sciences.

Teacher Selection and Interview Portfolios Ronald K. Theel, 2002-04-27. The major research questions for this study were: a) What forms do teacher interview portfolios take? b) What meaning do school principals make of these portfolios? c) How

if at all are teacher portfolios being used by principals in deciding whom to hire This was a case study using qualitative research procedures The study was situated in the hiring policies and practices of Central City School District from 1995 to 1999 Semi structured interviews of 18 k 12 principals and 4 key informants were primary means of data gathering Document analyses supplemented interview data Interview portfolios typically consisted of lesson plans photographs of projects activities and teacher student interactions and supporting examples of classroom practice Statements of educational philosophy credentials letters of reference transcripts and other background information were also included Most principals viewed portfolios as a way for candidates to express their educational beliefs illustrate skills and methods and supplement the interview with examples from applicants experience Principals expressed a desire for more evidence of having used the portfolio development process as a means of reflection and introspection Overall interview portfolios were not key contributors to principals hiring decisions The reasons for this varied Some principals mentioned time constraints during interviews Others expressed skepticism that portfolios provided meaningful evidence of candidates teaching ability and people skills Propositions and implications for future research center on portfolio format and assessment criteria authenticity and self knowledge selection interview procedures teacher preparation teacher recruitment and hiring and information management in Central City School District Perhaps one of the most valuable benefits of the portfolio process lies in the development of a new norm for the profession placing discussion and debate about what constitutes good teaching into a public forum
