**Abstract:** Research suggests that children and adolescents with chronic and severe mental illness are at risk for poor academic achievement and school attendance. However, little research has examined the extent to which these children and adolescents are at risk for poor academic achievement and school attendance. This study examined the extent to which children and adolescents with chronic and severe mental illness are at risk for poor academic achievement and school attendance. The study included 100 children and adolescents with chronic and severe mental illness, 100 children and adolescents with no mental illness, and 100 children and adolescents with mild mental illness. The children and adolescents with chronic and severe mental illness were significantly more likely to have poor academic achievement and school attendance than the children and adolescents with no mental illness and the children and adolescents with mild mental illness.
