Technical Analysis And Fundamental Analysis:

The Use of Technical and Fundamental Analysis in the Stock Market in Emerging and Developed Economies

Naveen B. Kumar, Sanjay Mohapatra, 2015-09-03 This book gives a scientific and systematic approach to trading in developing stock markets As professional traders do not trade purely on the basis of economic fundamentals but also take into account market movements from other factors knowledge of technical analysis is important to anyone who would participate successfully in the stock market

Fundamental Analysis, Behavioral Finance and Technical Analysis on the Stock Market Timo Schlichting, 2009-07-31 Diploma Thesis from the year 2008 in the subject Business economics Investment and Finance grade 2.0 University of Applied Sciences Essen language English abstract Historically considered fundamental and technical analyses have always competed often leading to advocates that ideologically judge either a fundamental analysis or technical analysis to be the one and only analyzing concept Behavioral finance is a relatively new scientific approach to explain psychological anomalies on the stock market but is also more and more often considered to be able to compete with both fundamental and technical analyses Still do these analysis concepts really compete in practice or could they actually supplement each other with their respective strengths Taking the turbulent stock market phases as well as these unanswered questions about fundamental analysis behavioral finance and the technical analysis into consideration this thesis ultimately pursues two general objectives Firstly fundamental analysis behavioral finance and technical analysis should be scientifically examined in terms of their premises analysis approaches empirical evidences as well as strengths and weaknesses Secondly it should be examined as to whether the fundamental analysis behavioral finance and technical analysis have theoretical and practical synthesis capabilities that could be used for developing a synthesis concept The synthesis concept should combine the respective strengths and eliminate the respective weaknesses of each of the three analysis concepts Fundamental analysis behavioral finance and technical analysis are examined in detail Empirical studies should prove if and by which approaches the analysis concept is able to predict future stock prices In order to be able to develop a synthesis concept each analysis concept is evaluated by a SWOT analysis pursuing the objective of determining the respective strengths weaknesses opportunities and threats of the

Alternative Analysis Methods Applied to the German Stock Market Timo Schlichting, 2009-07-24 Seminar paper from the year 2008 in the subject Business economics Investment and Finance grade 1.0 University of Applied Sciences Essen language English abstract The price movements of stocks are the result of complex interdependencies due to a vast number of influencing factors such as fundamental and psychological factors are expressed in the expectations and the behavior of the stock market participants To cope with this complexity and to derive an applicable asset strategy analysts distinguish particularly between two dominant analysis methods in practice the Fundamental and the Technical Analysis which have recently been supplemented by the approach of Behavioral Finance With reference to a strict interpretation of the theoretical assumptions of the Fundamental as well as the Technical Analysis

these two concepts are mutually exclusive As a result of this there are a vast number of analysts who either acknowledge the Fundamental Analysis while denying the Technical Analysis and vice versa The Fundamentals criticize that the technical approach has a lack in academic foundation and is therefore similar to a kind of reading tea leaves whereas the Technicals are convinced that the Fundamental Analysis is not able to generate an advantage by analyzing the fundamental value drivers of a stock because those are already reflected by the current market prices In practice the Fundamental Analysis seems to have its weaknesses particularly during extreme market phases e g during the New Economy bubble at the end of the nineties in which the psychology of the market participants gains in impact At the same time the fundamental aspects are seemingly neglected Furthermore the fundamental approach seems to have improvement capabilities particularly in terms of timing Psychological aspects of the market participants are at least indirectly included within the Technical Analysis which could be particularly used for timing decisions as well Nevertheless it has its weaknesses too e g it does not provide clearly defined interpretation rules for its various numbers of chart patterns and technical indicators Behavioral Finance seems to have its existence authority in practice as well due to decisions in stock markets made by human beings who do not always behave total rationally All these aspects lead to the master question if the two alternative analysis methods Technical Analysis and Behavioral Finance can deliver any useable supplements towards the Fundamental Analysis in terms of their practical application
