Vut Late Application:

Ageing and Employment Policies/Vieillesse et politiques de l'emploi: Netherlands 2005 OECD,2005-09-05

This report on the Netherlands contains a survey of the main barriers to employment for older workers an assessment of the adequacy and effectiveness of existing measures to overcome these barriers and a set of policy recommendations **War of the Mines** Paul Davies,1994 In this book written with first hand knowledge and a deep care for the Khmer people the author and photographer show that Cambodia exemplifies a worldwide plague of suffering and they propose what can be done to end the suffering I cannot recommend their work too highly John Pilger The high photographic content will place the book in an altogether different genre of reporting than the landmine issue has so far received It incorporates virtually all the existing research done of the mine problem in Cambodia to date as well as including original information Ed Miles Vietnam Veterans of America Foundation War of the Mines is a passionately detailed study of mines in a single country the most thorough account yet published of their effect on a civilian population a significant contribution to the growing awareness in the West of the peculiar perniciousness of these weapons John Ryle Times Literary Supplement War of the Mines is the first illustrated study of the impact of landmine warfare on communities in Cambodia After several visits to the country Davies and Dunlop have meticulously documented the history of landmine warfare in a country where it is estimated there are more landmines than there are people This book focuses on one particular district Rattanak Mondul in Battambang province the region which has had one of the highest concentrations of landmines Through hard hitting yet unsensational photographs and the personal accounts of landmine victims and military personnel War of the Mines offers a powerful description of the horrors of landmine warfare Reforming Early Retirement in Europe, Japan and the USA Bernhard Ebbinghaus,2008-10-16

Since the 1970s early exit from work has become a major challenge in modern welfare states Governments employers and unions alike once thought of early retirement as a peaceful solution to the economic problems of mass unemployment and industrial restructuring Today governments and international organizations advocate the postponement of retirement and an increase in activity among older workers Comparing the USA eight European countries and Japan this book demonstrates significant cross national differences in early retirement across countries and over time The study evaluates the impact of major variations in welfare regimes production systems and labor relations It stresses the importance of the pull factor of extensive welfare state provisions particularly in Continental Europe the push factor of labor shedding strategies by firms particularly in Anglo American market economies and the role of employers and worker representatives in negotiating retirement policies particularly in coordinated market economies Over the last three decades early retirement has become a popular social policy and employment practice in the workplace adding to the fiscal crises and employment problems of today s welfare states Attempts to reverse early retirement policies have led to major reform debates Unilateral government policies to cut back on social benefits have not had the expected employment results due to resistance from employers

workers and their organizations Successful reforms require the cooperation of both sides This study provides comprehensive empirical analysis and a balanced approach to studying both the pull and the push factors affecting early exit from work needed to understand the development of early retirement regimes *Active Ageing* Nick van den Heuvel,2006 *Early Retirement Behaviour in the Netherlands* Rob Euwals,Daniël van Vuuren,Ronald Wolthoff,2006 In the early 1990s the Dutch social partners agreed upon transforming the generous and actuarially unfair PAYG early retirement schemes into less generous and actuarially fair capital funded schemes The starting dates of the transitional arrangements varied by industry sector In this study we exploit the variation in starting dates to estimate the causal impact of the policy reform on early retirement behaviour We use a large administrative dataset the Dutch Income Panel 1989 2000 to estimate hazard rate models for early retirement We conclude that the policy reform induced workers to postpone early retirement *Extended Working Life Policies* Áine Ní Léime,Jim Ogg,Martina Rašticová,Debra Street,Clary Krekula,Monika Bédiová,Ignacio Madero-Cabib,2020-02-28 This open access book addresses the current debate on extended working life policy by considering the influence of gender and health on the experiences of older workers Bringing together an international team of scholars it tackles issues as gender health status and job occupational characteristics that structure the capacity and outcomes associated with working longer The volume starts with an overview of the empirical and policy literature continues with a discussion of the relevant theoretical perspectives includes a section on available data and indicators followed by 25 very concise and unique country reports that highlight the main extended working life EWL research findings and policy trajectories at the national level It identifies future directions for research and addresses issues associated with effective policy making This volume fills an important gap in the knowledge of the consequences of EWL and it will be an invaluable source for both researchers and policymakers

Hess, Stefanie König, 2016-12-14 To a backdrop of ageing societies pension crises and labour market reforms this book investigates how the policy shift from early retirement to active ageing has affected individual retirement behaviour Focusing on eleven European countries the United States and Japan it brings together leading international experts to analyze recent changes in pension systems Their findings demonstrate that there has been a fundamental transition in pension policies and a steep increase in older workers retirement ages and employment rates Yet changes in retirement behavior are not evenly distributed across all societal strata This raises the serious concern that an overall rise in the retirement age will be accompanied by the re emergence of social inequality in the transition from work to retirement This innovative edited collection will appeal to students and scholars of sociology economics political science human resources management gerontology and social policy and also to policy makers and professionals dealing with older workers
