Air Force Manual United States. Department of the Air Force, 1976 **Algorithmically Specialized Parallel Computers** Lawrence Snyder, Leah H. Jamieson, Dennis B. Gannon, 2014-05-10 Algorithmically Specialized Parallel Computers focuses on the concept and characteristics of an algorithmically specialized computer This book discusses the algorithmically specialized computers algorithmic specialization using VLSI and innovative architectures The architectures and algorithms for digital signal speech and image processing and specialized architectures for numerical computations are also elaborated Other topics include the model for analyzing generalized inter processor pipelined architecture for search tree maintenance and specialized computer organization for raster graphics display The data base applications of the FETCH AND ADD instruction distributed parallel architecture for speech understanding and two parallel formulations of particle in cell models are likewise covered in this text This publication is suitable for students researchers and professionals concerned with algorithmically specialized computers **The UDOFT Flight Simulation System**, 1964 **Dictionary of computing** Vittorio Ferretti, 1996-06-04 92000 Eintr ge 44000 deutsche und 48000 englische aller Gebiete der Informatik mit Hauptbegriffen der angrenzenden Fachgebiete sowie des allgemeinen technischen Sprachgebrauchs insgesamt 94 Fachgebiete **Algorithms for Elliptic Problems** Marián Vajtersic, 2013-03-09 This volume deals with problems of modern effective algorithms for the numerical solution of the most frequently occurring elliptic partial differential equations From the point of view of implementation attention is paid to algorithms for both classical sequential and parallel computer systems The first two chapters are devoted to fast algorithms for solving the Poisson and biharmonic equation In the third chapter parallel algorithms for model parallel computer systems of the SIMD and MIMD types are described The implementation aspects of parallel algorithms for solving model elliptic boundary value problems are outlined for systems with matrix pipeline and multiprocessor parallel computer architectures A modern and popular multigrid computational principle which offers a good opportunity for a parallel realization is described in the next chapter More parallel variants based in this idea are presented whereby methods and assignments strategies for hypercube systems are treated in more detail The last chapter presents VLSI designs for solving special tridiagonal linear systems of equations arising from finite difference approximations of elliptic problems For researchers interested in the development and application of fast algorithms for solving elliptic partial differential equations using advanced computer systems *Computerworld*, 2006-05-15 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **First Time Up** Brock Dethier, 2008-09-30 First time up an insider s friendly question from 1960s counter culture perfectly captures the spirit of this book A short supportive practical guide for the first time college composition instructor the book is upbeat wise but

friendly casual but knowledgeable like the voice that may have introduced you to certain other firsts With an experiential focus rather than a theoretical one *First Time Up* will be a strong addition to the newcomer's professional library and a great candidate for the TA practicum reading list Dethier author of *The Composition Instructor's Survival Guide* and *From Dylan to Donne* directly addresses the common headaches nightmares and epiphanies of composition teaching especially the ones that face the new teacher And since legions of new college composition teachers are either graduate instructors TAs or adjuncts without a formal background in composition studies he assumes these folks as his primary audience Dethier's voice is casual but it conveys concern humor experience and reassurance to the first timer He addresses all major areas that graduate instructors or new adjuncts in a writing program are sure to face from career anxiety to thoughts on grading and keeping good classroom records Dethier's own eclecticism is well represented here but he reviews with considerable deftness the value of contemporary scholarship to first time writing instructors many of whom will be impatient with high theory Throughout the work he affirms a humane confident approach to teaching along with a true affection for college students and for teachers just learning to deal with them
