Religious Education in Malawi and Ghana Yonah Matemba, Richardson Addai-Mununkum, 2021-03-15. Religious Education in Malawi and Ghana contributes to the literature on opportunities and complexities of inclusive approaches to Religious Education. RE It analyses how RE in Malawi and Ghana engages with religious pluralisation and provides a compelling case for the need to re-evaluate current approaches in the conceptualisation, curriculum design and delivery of RE in schools in Malawi and Ghana. The book explains how a pervasive tradition of selection involving exclusion and inclusion of religion in RE leads to misrepresentation and in turn to misclusion of non normative religions where religion is included but marginalized and misrepresented. The book contributes to wider discourse of RE on opportunities as well as complexities of post-confessional approaches including the need for RE to avoid perpetuating the continued legitimisation of selected religions and in the process the delegitimation of the religious other as a consequence of misrepresentation and misclusion. Inspired by Braten's methodology for comparative studies in RE, the book draws on two qualitative studies from Malawi and Ghana to highlight the pervasive problems of religious misclusion in RE. This book will be of great interest for academics, scholars and post-graduate students in the fields of RE, African education, educational policy, international education and comparative education. **International Reflections on the Netherlands Didactics of Mathematics** Marja van den Heuvel-Panhuizen, 2019-08-13. This open access book, inspired by the ICME 13 Thematic Afternoon on European Didactic Traditions, takes readers on a journey with mathematics education researchers, developers and educators in eighteen countries who reflect on their experiences with Realistic Mathematics Education (RME), the domain-specific instruction theory for mathematics education developed in the Netherlands since the late 1960s. Authors from outside the Netherlands discuss what aspects of RME appeal to them, their criticisms of RME and their past and current RME-based projects. It is clear that a particular approach to mathematics education cannot simply be transplanted to another country. As such, in eighteen chapters, the authors describe how they have adapted RME to their individual circumstances and view on mathematics education and tell their personal stories about how RME has influenced their thinking on mathematics education.
