*Industrialization of High Order Methods A Top Down Approach* The goal of this project was the improvement utilization and demonstration of innovative higher order simulation capabilities for large scale aerodynamic application challenges in the aircraft industry The IDIHOM consortium consisted of 21 organizations including aircraft manufacturers software vendors as well as the major European research establishments and several universities all of them with proven expertise in the field of computational fluid dynamics After a general introduction to the project the book reports on new approaches for curved boundary grid generation high order solution methods and visualization techniques It summarizes the achievements weaknesses and perspectives of the new simulation capabilities developed by the project partners for various industrial applications and includes internal and external aerodynamic as well as multidisciplinary test cases

**Life Beside Itself**  
Lisa Stevenson, 2014-08-22 This ethnographic study examines two historical moments in the Canadian Arctic the Inuit tuberculosis epidemic 1940s to the early 1960s and the subsequent suicide epidemic 1980s to the present The colonial Canadian North was imagined as a laboratory for a social experiment to transform Inuit into bona fide Canadian citizens by among other things reducing their death rate This experiment demanded Inuit cooperation with the forms of anonymous care the state provided including the evacuation of tubercular Inuit Southern Sanatoria which left many Inuit families without the story or image of their loved one's death A similar indifference to who lives or dies is manifest in the adoption of the suicide hotline an explicitly anonymous form of care where caregivers exhort unidentified Inuit to live while simultaneously expecting them to die Through attention to the images through which people think and dream Stevenson describes a world in which life is beside itself the name soul of a teenager who dies in a crash lives again in his friend's newborn baby a young girl shares a last smoke with a dead friend in a dream the possessed hands of a clock spin uncontrollably over its face For the Inuit life is somewhere else and Stevenson attempts to articulate forms of care adequate to that truth

**Introduction to Quantum Information Science** Masahito Hayashi, Satoshi Ishizaka, Akinori Kawachi, Gen Kimura, Tomohiro

Ogawa, 2014-08-22 This book presents the basics of quantum information e.g. foundation of quantum theory quantum

algorithms quantum entanglement quantum entropies quantum coding quantum error correction and quantum cryptography The required knowledge is only elementary calculus and linear algebra This way the book can be understood by undergraduate students In order to study quantum information one usually has to study the foundation of quantum theory This book describes it from more an operational viewpoint which is suitable for quantum information while traditional textbooks of quantum theory lack this viewpoint The current book bases on Shor s algorithm Grover s algorithm Deutsch Jozsa s algorithm as basic algorithms To treat several topics in quantum information this book covers several kinds of information quantities in quantum systems including von Neumann entropy The limits of several kinds of quantum information processing are given As important quantum protocols this book contains quantum teleportation quantum dense coding quantum data compression In particular conversion theory of entanglement via local operation and classical communication are treated too This theory provides the quantification of entanglement which coincides with von Neumann entropy The next part treats the quantum hypothesis testing The decision problem of two candidates of the unknown state are given The asymptotic performance of this problem is characterized by information quantities Using this result the optimal performance of classical information transmission via noisy quantum channel is derived Quantum information transmission via noisy quantum channel by quantum error correction are discussed too Based on this topic the secure quantum communication is explained In particular the quantification of quantum security which has not been treated in existing book is explained This book treats quantum cryptography from a more practical viewpoint      **Foreign Dialects** Lewis

Herman,Marquerite Shalett Herman,2014-05-01 Most actors and directors have struggled with the problem of needing to imitate foreign dialects Marguerite and Lewis Herman have created an essential tool for actors directors and writers aiming toward the most authentic performances possible Foreign Dialects contains an extensive repertoire of dialects that will assist the actor in the preparation for the most difficult foreign roles Now in paperback this classic text offers the director or producer a quick convenient aid for correcting actors and evaluating applicants for authenticity and dialect ability In addition it guides those writing fiction as well as radio movie and television scripts Thirty foreign dialects are provided with character studies speech peculiarities and examples of the dialects in easy to read phonetic monologues including Cockney British Irish Scottish French German Spanish Swedish Polish Greek and Yiddish      Innovation, Communication and Engineering

Teen-Hang Meen,Stephen Prior,Artde Donald Kin-Tak Lam,2013-10-08 This volume represents the proceedings of the 2013 International Conference on Innovation Communication and Engineering ICICE 2013 This conference was organized by the China University of Petroleum Huadong East China and the Taiwanese Institute of Knowledge Innovation and was held in Qingdao Shandong P R China October 26 November 1 2013 The conference received 653 submitted papers from 10 countries of which 214 papers were selected by the committees to be presented at ICICE 2013 The conference provided a unified communication platform for researchers in a wide range of fields from information technology communication science and

applied mathematics to computer science advanced material science design and engineering This volume enables interdisciplinary collaboration between science and engineering technologists in academia and industry as well as networking internationally Consists of a book of abstracts 260 pp and a USB flash card with full papers 912 pp      **Bridge Employment** Carlos-María Alcover, Gabriela Topa, Emma Parry, Franco Fraccaroli, Marco Depolo, 2014-04-16 With the long term trend toward earlier retirement slowing and the majority of older workers remaining in employment up to and beyond statutory retirement age it is increasingly important that we understand how to react to these changes Bridge employment patterns and activities have changed greatly over the past decade yet there is little information about the benefits of the various different forms this can take both for employees and employers This comparative international collection provides the first comprehensive summary of the literature on bridge employment bringing together experiences from Europe the United States Canada Australia and Japan It identifies the opportunities barriers and gaps in knowledge and practice whilst offering recommendations on how organisations and individuals can cope with future challenges in aging and work Written by international experts in the field each chapter also makes substantive and contextualized suggestions for public policy and organizational decision makers providing them with a roadmap to implement and integrate bridge employment into policies and practices designed to prolong working life a priority for workers organizations and societies in the coming decades This unique research handbook will be useful to a wide range of readers with an interest in the new concept of bridge employment and the extension of working life and of interest to researchers and practitioners in organizational behavior labor market analysis human resource management career development counselling occupational health social economy and public policy administration      **Advances and Trends in Engineering Sciences and Technologies** Mohamad Ali, Peter Platko, 2015-10-06 The International Conference on Engineering Sciences and Technologies ESaT 2015 organized under the auspices of the Faculty of Civil Engineering Technical University in Košice Slovak Republic was held May 27-29 2015 in the High Tatras Slovak Republic Facilitating discussions on novel and fundamental advances in the fields of      **Numerical Simulations of Coupled Problems in Engineering** Sergio R. Idelsohn, 2014-05-09 This book presents and discusses mathematical models numerical methods and computational techniques used for solving coupled problems in science and engineering It takes a step forward in the formulation and solution of real life problems with a multidisciplinary vision accounting for all of the complex couplings involved in the physical description Simulation of multifaceted physics problems is a common task in applied research and industry Often a suitable solver is built by connecting together several single aspect solvers into a network In this book research in various fields was selected for consideration adaptive methodology for multi physics solvers multi physics phenomena and coupled field solutions leading to computationally intensive structural analysis The strategies which are used to keep these problems computationally affordable are of special interest and make this an essential book      *Regulated Grammars and Automata* Alexander Meduna, Petr Zemek, 2014-07-08 This is the first

book to offer key theoretical topics and terminology concerning regulated grammars and automata. They are the most important language defining devices that work under controls represented by additional mathematical mechanisms. Key topics include formal language theory, grammatical regulation, grammar systems, erasing rules, parallelism, word monoids, regulated and unregulated automata, and control languages. The book explores how the information utilized in computer science is most often represented by formal languages defined by appropriate formal devices. It provides both algorithms and a variety of real world applications allowing readers to understand both theoretical concepts and fundamentals. There is a special focus on applications to scientific fields including biology, linguistics, and informatics. This book concludes with case studies and future trends for the field. *Regulated Grammars and Automata* is designed as a reference for researchers and professionals working in computer science and mathematics who deal with language processors. Advanced level students in computer science and mathematics will also find this book a valuable resource as a secondary textbook or reference.

*Mathematical Elasticity* Philippe G. Ciarlet, 2022-01-22 The first book of a three volume set. *Three Dimensional Elasticity* covers the modeling and mathematical analysis of nonlinear three dimensional elasticity. It includes the known existence theorems either via the implicit function theorem or via the minimization of the energy. John Ball's theory. An extended preface and extensive bibliography have been added to highlight the progress that has been made since the volume's original publication. While each one of the three volumes is self contained, together the *Mathematical Elasticity* set provides the only modern treatise on elasticity. It introduces contemporary research on three dimensional elasticity, the theory of plates and the theory of shells and contains proofs, detailed surveys of all mathematical prerequisites and many problems for teaching and self study. These classic textbooks are for advanced undergraduates, first year graduate students and researchers in pure or applied mathematics or continuum mechanics. They are appropriate for courses in mathematical elasticity, theory of plates and shells, continuum mechanics, computational mechanics and applied mathematics in general.

**Sephardic and Mizrahi Literature** Dario Miccoli,2017-04-21 This book argues that the literary texts produced by Sephardic and Mizrahi Jews who migrated from the Middle East and North Africa in the 1950s onwards should be considered as part of a transnational arena in which forms of Jewish diasporism and postcolonial displacement interweave Through an original perspective that focuses on novelists poets professional and amateur writers the book explains that these Sephardic and Mizrahi authors are part of a global literary diaspora at the crossroads of past Arab legacies new national identities and persistent feelings of Jewishness **Cross-Lingual Word Embeddings** Anders Søgaard,Ivan Vulić,Sebastian Ruder,Manaal Faruqi,2022-05-31 The majority of natural language processing NLP is English language processing and while there is good language technology support for standard varieties of English support for Albanian Burmese or Cebuano and most other languages remains limited Being able to bridge this digital divide is important for scientific and democratic reasons but also represents an enormous growth potential A key challenge for this to happen is learning to align basic meaning bearing units of different languages In this book the authors survey and discuss recent and historical work on supervised and unsupervised learning of such alignments Specifically the book focuses on so called cross lingual word embeddings The survey is intended to be systematic using consistent notation and putting the available methods on comparable form making it easy to compare wildly different approaches In so doing the authors establish previously unreported relations between these methods and are able to present a fast growing literature in a very compact way Furthermore the authors discuss how best to evaluate cross lingual word embedding methods and survey the resources available for students and researchers interested in this topic

*Genocide Perspectives VI* Nikki Marczak,Kirril Shields ,2020-12-21 *Genocide Perspectives VI* grapples with two core themes the personal toll of genocide and processes that facilitate the crime From political choices governments and leaders make through to denialism and impunity the crime of genocide recurs again and again across the globe At what cost to individuals and communities What might the legacy of this criminality be This collection of essays examines the personal sacrifice genocide takes from those who live through the trauma and the generations that follow Contributors speak to the way visual art and literature attempt to represent genocide hoping to make sense of problematic histories while also offering a means of reflection after years of slow violence or silenced memories Some authors generously allow us into their own histories or contemplate how they may have experienced genocide had they been born in another time or place What facets

contribute to the processes that lead to or enable the crime of genocide This collection explores those processes through a variety of case studies and lenses How do nurses whose role is inherently linked to care and compassion become mass killers How do restrictions on religious freedom play a role in advancing genocidal policies and why do perpetrators of genocide often target religious leaders Why is it so important for Australia and other nations with histories of colonial genocide to acknowledge their past Among the essays published in this volume we have the privilege and the sorrow of publishing the very last essay Professor Colin Tatz wrote before his passing in 2019 His contribution reveals yet again the enormous influence of both his research and his original ideas on genocide He reflects on continuing legacies for Indigenous Australian communities with whom he worked for many decades and adds nuance to contemporary understanding of the Armenian Genocide and the Holocaust two other cases to which he was deeply committed
