Advanced Analytic and Control Techniques for Thermal Systems with Heat Exchangers Libor Pekar, 2020-07-10

Advanced Analytic Control Techniques for Thermal Systems with Heat Exchangers presents the latest research on sophisticated analytic and control techniques specific for Heat Exchangers HXs and heat Exchanger Networks HXNs such as Stability Analysis Efficiency of HXs Fouling Effect Delay Phenomenon Robust Control Algebraic Control Geometric Control Optimal Control Fuzzy Control and Artificial Intelligence techniques Editor Libor Pekar and his team of global expert contributors combine their knowledge and experience of investigated and applied systems and processes in this thorough review of the most advanced networks analyzing their dynamics efficiency transient features physical properties performance feasibility flexibility and controllability The structural and dynamic analyses and control approaches of HXNs as well as energy efficient manipulation techniques are discussed in addition to the design of the control systems through the full life cycle This equips the reader with an understanding of the relevant theory in a variety of settings and scenarios and the confidence to apply that knowledge to solve problems in an academic or professional setting Graduate students and early mid career professionals require a robust understanding of how to suitably design thermal systems with HXs and HXNs to achieve required performance levels which this book offers in one consolidated reference All examples and solved problems included have been tried and tested and these combined with the research driven theory provides professionals researchers and students with the most recent techniques to maximize the energy efficiency and sustainability of existing and new thermal power systems Analyses several advanced techniques the theoretical background of these techniques and includes models examples and results throughout Focusses on advanced analytic and control techniques which have been investigated or applied to thermal systems with HXs and HXNs Includes practical applications and advanced ideas from leading experts in the field as well as case studies and tested problems and solutions

Redefining Education and Development Kaitano Dube, 2024-10-18 The book aligns with the United Nations Sustainable Development Goals SDGs particularly Goal 4 which focuses on quality education It explores the evolving role of education as a critical driver for achieving all 17 SDGs by providing a platform for discussing innovative educational models and theories that foster sustainable development The book takes an interdisciplinary approach merging educational theory developmental practice and human psychology to address complex global challenges hindering sustainable development The book includes case studies and empirical research such as exploring student entrepreneurship in the agricultural sector and the factors bridging the gap between entrepreneurial intention and venture creation These examples provide readers with practical applications of theoretical concepts and demonstrate the real world impact of educational innovations which is at the core of education delivery for all and how education touches on other areas of the SDGs The book offers valuable insights for policymakers educators and development practitioners by presenting research and theory based analyses It suggests ways to improve the academic environment to

foster entrepreneurship and innovation which are key to economic development and job creation especially in regions with high youth unemployment rates The content suggests educational reforms that are responsive to the changing societal and economic landscapes The book s blend of theory and practice targets a broad audience including academic scholars students development agencies non governmental organisations and policymakers It seeks to engage these diverse readers in a conversation about the future of education and its role in achieving sustainable development In summary the book seeks to provide a comprehensive exploration of the nexus between education development and human needs in the context of the SDGs offering innovative perspectives and practical solutions to equip readers to contribute to sustainable global development

Wireless Power Transmission for Sustainable Electronics Nuno Borges Carvalho, Apostolos Georgiadis, 2020-01-30 Provides a collection of works produced by COST Action IC1301 with the goal of achieving significant advances in the field of wireless power transmission This book constitutes together information from COST Action IC1301 a group of academic and industry experts seeking to align research efforts in the field of wireless power transmission WPT It begins with a discussion of backscatter as a solution for Internet of Things IoT devices and goes on to describe ambient backscattering sensors that use FM broadcasting for low cost and low power wireless applications The book also explores localization of passive RFID tags and augmented tags using nonlinearities of RFID chips It concludes with a review of methods of electromagnetic characterization of textile materials for the development of wearable antennas Wireless Power Transmission for Sustainable Electronics COST WiPE IC1301 covers textile supported wireless energy transfer and reviews methods for the electromagnetic characterization of textile materials for the development of wearable antennas It also looks at backscatter RFID sensor systems for remote health monitoring simultaneous localization of robots and objects and mapping SLAM autonomous system of wireless power distribution for static and moving nodes of wireless sensor networks and more Presents techniques for smart beam forming for on demand wireless power transmission WPT Discusses RF and microwave energy harvesting for space applications Describes miniaturized RFID transponders for object identification and sensing Wireless Power Transmission for Sustainable Electronics COST WiPE IC1301 is an excellent book for both graduate students and industry engineers involved in wireless communications and power transfer and sustainable materials for those fields
