With Sony, Anyone Can Shoot Like a Pro. Sony's α (alpha) DSLR-A100 camera combines 10 MP performance, high-sensitivity shooting, Super SteadyShot in-camera image stabilization, Dynamic Range Optimizer to recapture detail and Eye-Start II Autofocus for faster response – plus precise Sony II and Carl Zeiss lens systems and Minolta R-mount lens compatibility.

— Superior Electronics, Amazing Simplicity

In the revolutionary new Sony II α (alpha) DSLR-A100 camera, Sony digital technology takes you a giant step toward professional performance – with advanced imaging, image stabilization and creative control functions, plus ease of operation that helps everyone take better digital pictures right from the start.

— Advanced Lenses and Accessories

The Sony II α (alpha) DSLR-A100 camera is your gateway to an incredibly sophisticated array of lenses and accessories – including precision Sony II standard and zoom lenses, Sony II "G" Series lenses with advanced motorized autofocus, amazingly bright Carl Zeiss T* coated lenses, professional-quality flash units, and compatibility with over 15 million Maxxum II, Dynax and Amount lenses sold worldwide.

— 10 MP APS-size CCD Imager

A large APS-size CCD imager allows more light to pass to each pixel, increasing sensitivity and reducing noise – and providing greater detail when you make big prints or crop in close on your subject.

— Super SteadyShot® Image Stabilization

When you shoot with high sensitivity, the shutter remains open longer – so to compensate for shaky hands or fast-moving subjects, the Sony II Super SteadyShot system automatically reduces image blur. And because it works in-camera, you'll get the benefit of Super SteadyShot stabilization with every lens you use.

— Sharp, Clear Photos that Preserve the Mood

With high-sensitivity (ISO 1600) shooting, the Sony II α (alpha) DSLR-A100 camera captures great photos without flash even in low light – which makes it an ideal system camera for shooting without a tripod or in locations (like museums and churches) where flash is prohibited.

— Anti-Dust Technology

Changing lenses in a DSLR can allow dust to enter the camera – so to keep the CCD imager clean for better pictures, the Sony II α (alpha) DSLR-A100 camera utilizes both static-free anti-dust coating on the CCD filter and anti-dust vibration that automatically shakes the CCD to dislodge dust each time the camera is shut off.

— Dynamic Range Optimizer

To recover details in dark or bright areas of the picture, the Sony II α (alpha) DSLR-A100 camera provides two levels of Dynamic Range Optimization: Normal DRO, to improve shadow detail using standard gamma curves for fast shot-to-shot response time, or Advanced DRO, to adjust dynamic range area-by-area for the greatest precision.

— Bionz™ Image Processor

At the heart of the Sony II α (alpha) DSLR-A100 camera is the advanced Bionz™ Image Processor, using hardware-based Large Scale Integrated (LSI) circuitry that responds ten times faster than software image processors – improving camera response time, handling Dynamic Range Optimization processing, and extending Stamina battery life.

— Eye-Start® Autofocus System

Some DSLR systems don't start focusing until the shutter button is half-pressed – but that can slow down camera response. The Sony II α (alpha) DSLR-A100 camera begins its precision autofocus adjustments the moment you bring your eye to the viewfinder, to capture fast-action subjects other cameras might blur.

— 3.5" Clear Photo LCD Plus™ Screen

The Clear Photo LCD Plus™ design of the Sony II α (alpha) DSLR-A100 camera's built-in screen makes it easy to read camera setup menus even in bright sunlight – and gives you a better picture when you use your screen to set up shots and check results.

— Continuous Burst Mode at 3 Frames Per Second

To catch fast action more effectively, the Sony II α (alpha) DSLR-A100 camera offers continuous JPEG image capture up to the limit of your flash memory card – plus RAW Burst Mode (up to 5 shots) with intelligent buffer management to allow more shots to be captured without waiting for the buffer to clear.

Sony Dslr A100 Manual

Peter K. Burian

Sony Dslr A100 Manual:

Sony Alpha DSLR A100: A Better Manual Ken Milburn, 2007-05-04 This unique manual is better than the manual that comes with your camera in several important ways. It's organized according to efficient workflow so you can get the most out of your Sony A100 quickly and with the least amount of bother. You can find what you're looking for interactively by using the interactive Table of Contents, choosing one of the questions in the Quick Answers section, or by following any of the convenient links we've placed throughout the document. It's not a book unless you want it to be. It's a PDF that you can read on your computer or on a PDA that fits into your camera bag. It is laid out on an 8.5 x 11 inch page so if you want to print you won't have to waste paper or spend time configuring your printer. Because it's a PDF you can find subjects you're looking for by searching electronically. Typing Cmd/Ctrl F brings up the familiar search dialog. So all you have to do to jump straight to all the references to a particular part or feature is to enter its name. No reliance on a mindreading indexer. The PDF is photographically illustrated so you can see exactly which combination of buttons, knobs, wheels, and menu choices will help you make the magic you are hoping for. In addition to teaching technically correct procedures, this document offers valuable hints for taking photographs in some of the toughest situations.
