Th International Conference On Digital Enterprise Technology:

Proceedings of the 6th CIRP-Sponsored International Conference on Digital Enterprise Technology George Q. Huang, K.L. Mak, Paul G. Maropoulos, 2009-12-12 This Proceedings volume contains articles presented at the CIRP Sponsored International Conference on Digital Enterprise Technology DET2009 that takes place December 14-16, 2009 in Hong Kong. This is the 6th DET conference in the series and the first to be held in Asia. Professor Paul Maropoulos initiated, hosted and chaired the 1st International DET Conference held in 2002 at the University of Durham. Since this inaugural first DET conference, the DET conference series has been successfully held in 2004 at Seattle, Washington, USA; in 2006 at Setúbal, Portugal; in 2007 at Bath, England; and in 2008 at Nantes, France. The DET2009 conference continues to bring together international expertise from the academic and industrial fields, pushing forward the boundaries of research knowledge and best practice in digital enterprise technology for design and manufacturing and logistics and supply chain management. Over 120 papers from over 10 countries have been accepted for presentation at DET2009 and inclusion in this Proceedings volume after a stringent refereeing process. On behalf of the organizing and program committees, the Editors are grateful to the many people who have made DET2009 possible: to the authors and presenters, especially the keynote speakers; to those who have diligently reviewed submissions; to members of the International Scientific Committee, Organizing Committee, and Advisory Committee; and to colleagues for their hard work in sorting out all the arrangements. We would also like to extend our gratitude to DET2009 sponsors, co-organizers, and supporting organizations.

5th International Conference on Digital Enterprise Technology Alain Bernard, 2010 Digital Enterprise Technology. DET is more than a concept. Companies are facing new challenges in a context where the references are mostly numerical. Nowadays, digital methods and tools are widely generalized. DET 2008 allowed excellent exchanges about the collection of systems and methods for the digital modelling and analysis of the global product development and realisation process in the context of lifecycle management. This book of proceedings gives a short version of the keynotes and proposes the text of the papers that have been presented during DET 2008. This gives a clear view of the actual state of the art and of the industrial needs. This book of proceedings is organized with respect to the topics that were addressed during the conference.

Micro-Assembly Technologies and Applications Svetan Ratchev, 2008-01-15 Micro assembly is a key enabling technology for cost effective manufacture of new generations of complex micro products It is also a critical technology for retaining industrial capabilities in high labour cost areas such as Europe since up to 80% of the production cost in some industries is attributed directly to assembly processes With the continuous trend for product miniaturisation the scientific and technological developments in micro assembly are expected to have a significant long term economic demographic and social impact A distinctive feature of the process is that surface forces are often dominant over gravity forces which determines a number of specific technical challenges Critical areas which are currently being addressed include development of assembly systems with high positional accuracy micro gripping methods that take into account the adhesive surface forces high precision micro feeding techniques and micro joining processes Micro assembly has developed rapidly over the last few years and all the predictions are that it will remain a critical technology for high value products in a number of key sectors such as healthcare communications defence and aerospace The key challenge is to match the significant technological developments with a new generation of micro products

that will establish firmly micro assembly as a core manufacturing process *Manufacturing Systems and Technologies for the New Frontier* Fumihiko Kimura, 2008-05-19 Collected here are 112 papers concerned with new directions in manufacturing systems given at the 41st CIRP Conference on Manufacturing Systems The high quality material includes reports of work from both scientific and engineering standpoints **Applications of Information Systems to Homeland Security and Defense** Abbass, Hussein A., Essam, Daryl, 2005-09-30 This book provides an overview of complex systems techniques and presents both guidelines and specific instances of how they can be applied to security and defense applications Provided by publisher **Special Issue: Digital Enterprise Technology** Jafar Jamshidi, Pedro F.
