The Animation :

The Animation Studies Reader Nichola Dobson, Annabelle Honess Roe, Amy Ratelle, Caroline Ruddell, 2018-10-18 The Animation Studies Reader brings together both key writings within animation studies and new material in emerging areas of the field. The collection provides readers with seminal texts that ground animation studies within the contexts of theory and aesthetics, form and genre, and issues of representation. The first section collates key readings on animation theory on how we might conceptualise animation and on some of the fundamental qualities of animation. New material is also introduced in this section specifically addressing questions raised by the nature, style, and materiality of animation. The second section outlines some of the main forms that animation takes, which includes discussions of genre. Although this section cannot be exhaustive, the material chosen is particularly useful as it provides samples of analysis that can illuminate some of the issues the first section of the book raises. The third section focuses on issues of representation and how the medium of animation might have an impact on how bodies, gender, sexuality, race, and ethnicity are represented. These representations can only be read through an understanding of the questions that the first two sections of the book raise; we can only decode these representations if we take into account form and genre and theoretical conceptualisations such as visual pleasure, spectacle, the uncanny, realism, etc.

The Animation Textbook Rao Heidmets, 2022-12-13 This introductory textbook provides practical exercises to help students and beginner animators get to grips with the basics of creating animated films. It covers both traditional 2D and 3D animated film, as well as experimental and computer animation. The first part of the book includes exercises colour-coded by difficulty to guide readers through the activities as they become more challenging. The second part of the book focuses on development, pre-production, production, and post-production to assist you with making your animated films feel more professional. The book also includes information and guidance on how to easily create animation using only a mobile phone. This book will be helpful to all students and newcomers looking to gain a grounding in the basics of animated film.
