Schroeder,2022-07-19 This book is a comprehensive guide to an exciting new approach that managers at any level can use to transform their corners of government Whether people want more government or less everyone wants an efficient government Traditional thinking is that this requires a government to be run more like a business But a government is not a business and this approach merely replaces old problems with new ones In their six year five country study of seventy seven government organizations ranging from small departments to entire states Alan Robinson and Dean Schroeder found that the predominant private sector approaches to improvement don t work well in the public sector while practices that are rare in the private sector prove highly effective The highest performers they studied had attained levels of efficiency that rivaled the best private sector

companies Rather than management making the improvements as is the norm in the private sector these high performers focused on front line driven improvement where most of the change activity was led by supervisors and low level managers who unleashed the creativity and ideas of their employees to improve their operations bit by bit every day You ll discover how Denver s Department of Excise and Licenses reduced wait times from an hour and forty minutes to just seven minutes how the Washington State Patrol garage tripled its productivity and became a national benchmark how a K8 school in New Brunswick Canada boosted the percentage of students reading at the appropriate age level from 22 percent to 78 percent and much more
