Patent Management and Valuation Grid Thoma, 2016-06-23 Research on patent valuation has become increasingly important in academic and policy circles in the last few decades In part this is the outcome of the wide consensus that innovation is a crucial ingredient for growth at various levels On the other hand there has also been an overcoming of growth models unilaterally focused on technological oriented approaches This

book presents novel and original research on patent value determinants which are intrinsic or extrinsic to the innovator's business model. Grid Thoma has undertaken a long study on the strategic factors affecting patent valuation bringing extensive quantitative evidences across various geographical and institutional contexts. Beforehand the valuation of the patent real options is appraised when the innovator can postpone the additional investment required for the patent's successful exploitation. Then he analyses what other complementary IP strategies are combined with patenting that in turn directly affect the value of patents. Moreover the book scrutinizes the so called strategic patenting hypothesis according to which innovators obtain patents for other reasons beyond gaining IP protection. A second order of strategic factors affecting the value of patents resides at the outset of the invention process. These are constituted by knowledge spillovers which are typically mediated by the local geographical context where the invention process takes place. The analysis shows that the contribution of knowledge spillovers from business and nonbusiness organizations to the value of the patented R D constitutes a relevant aspect for an innovator's decision making. This thoughtful cutting edge research book is vital reading for researchers, academics and policy decision makers in the area of in market valuation, management of technology innovation, management and economic geography.

Information Technology in Vietnam (and Southeast Asia): Discussion Cases Mathews Zanda Nkhoma, Narumon Sriratanaviriyakul, Hiep Pham, Vo Thi Trung Trinh, Huan Khoa Le, Hung Xuan Vo, 2014 Over the past decade Vietnam has become a major player in the rapidly growing region of Southeast Asia.
