contains almost three times as many food entries and double the number of components with increased overall data quality. Many of the data points from WAFCT 2012 have been replaced with better data, mostly analytical data from Africa, with a special emphasis on Western Africa. These improvements are essential to understanding the nutrient composition of foods in the region and to promoting their appropriate use. WAFCT 2019 is the result of four years of collaboration among INFOODS network researchers in Africa and the Nutrition and Food Systems Division of FAO and was developed as part of the International Dietary Data Expansion (INDDEX) Project implemented by Tufts University's Gerald J. and Dorothy R. Friedman School of Nutrition Science and Policy with funding from the Bill and Melinda Gates Foundation. These new data from WAFCT 2019 will support further research towards an expanded and improved evidence base and will support better, more informed decisions and effective policies and programmes for improved nutrition in Africa.

Seas of Venus, Second Edition David Drake, 2013-01-09. Now with new content by David Drake. THE MOST COLORFUL MYTH FROM SCIENCE FICTION: THE GOLDEN AGE IS REBORN IN SEAS OF VENUS. Earth is a dead cinder beyond the dense clouds. On a terraformed Venus, the land is ruled by savage plants and the even more savage beasts that prey on them, while monsters out of nightmare swim through the globe-girdling seas. Mankind huddles in domed underwater keeps, living a purposeless, static existence dedicated to pleasure but destined for oblivion later, if not sooner. Only the Free Companions, the mercenaries who fight proxy wars for the keeps, live on the surface of Venus. Their warships course the seas, battling one another in struggles to decide victory or defeat for one day's life or death for a few individuals. The Free Companions live till they die with the searing thrill of danger, and their deeds bring excitement and color to the bored residents of the keeps, but Mankind is doomed unless something changes. Few are willing to risk their lives for that change, battling both the terrifying environment and the ruthless oligarchs for whom the status quo means a lifetime of luxury. But there are a handful of courageous visionaries in the keeps and in the Free Companies, where death is a way of life. At the publisher's request, this title is sold without DRM (Digital Rights Management). Only a few of us have enough willpower when a new Dick Francis or the latest volume of a David Drake series comes out in hardcover to wait for the paperback. David Friedman's *Hidden Order: The Economics of Everyday Life* is the best in military science fiction. Recommended Booklist: the master of the mercenary science fiction novel. He has developed a following just short of cult proportions. Rave Reviews: Drake is one of the most gifted users of historical and military raw materials at work today. Chicago Sun Times. *The Psychic Factor* Charles Van Norden, 1894.
