for Business and Decision Making Luiz Paulo Favero,Patricia Belfiore,2019-04-11 Data Science for Business and Decision Making covers both statistics and operations research while most competing textbooks focus on one or the other As a result the book more clearly defines the principles of business analytics for those who want to apply quantitative methods in their work Its emphasis reflects the importance of regression optimization and simulation for practitioners of business analytics Each chapter uses a didactic format that is followed by exercises and answers Freely accessible datasets enable students and professionals to work with Excel Stata Statistical Software and IBM SPSS Statistics Software Combines statistics and operations research modeling to teach the principles of business analytics Written for students who want to apply statistics optimization and multivariate modeling to gain competitive advantages in business Shows how powerful software packages such as SPSS and Stata can create graphical and numerical outputs **Limitations of contract farming as a pro-poor**

strategy: The case of maize outgrower schemes in upper West Ghana Ragasa, Catherine,Lambrecht, Isabel,Kufoalor, Doreen S.,2017-03-30 The focus in this paper is on two relatively large maize based contract farming CF schemes with fixed input packages Masara and Akate and a number of smaller and more flexible CF schemes in a remote region in Ghana Upper West Results show that these schemes led to improved technology adoption and yield increases In addition a subset of maize farmers with high yield improvements due to CF participation had high gross margins However on average yields were not high enough to compensate for higher input requirements and cost of capital On average households harvest 29 30 bags 100

kg each or 2 9 3 0 metric tons of maize per hectare and the required repayment for fertilizer seed herbicide and materials provided under the average CF scheme is 21 25 bags 50 kg each per acre or 2 6 3 0 tons per hectare which leaves almost none for home consumption or for sale Despite higher yields the costs to produce 1 ton of maize under CF schemes remain high on average higher than on maize farms without CF schemes more than twice that of several countries in Africa and more than seven times higher than that of major maize exporting countries the United States Brazil and Argentina

Sustainability of these CF schemes will depend on from the firms perspective minimizing the costs to run and monitor them and from the farmers perspective developing and promoting much improved varieties and technologies that may lead to a jump in yields and gross margins to compensate for the high cost of credit **Entrepreneurship, Competitiveness and**

shows how Rwanda s development model and the organisation of genocide are two sides of the same coin In the absence of mineral resources the elite organised and managed the labour of peasant producers as efficient as possible In order to stay in power and benefit from it the presidential clan chose a development model that would not change the political status quo When the latter was threatened the elite invoked the preservation of group welfare of the Hutu called for Hutu unity and solidarity and relied on the great mass rubanda nyamwinshi for the execution of the genocide A strategy as simple as it is horrific The genocide can be regarded as the ultimate act of self preservation through annihilation under the veil of self defense Why did tens of thousands of ordinary people massacred tens of thousands other ordinary people in Rwanda in 1994 What has agricultural policy and rural ideology to do with it What was the role of the Akazu the presidential clan around president Habyarimana Did the civil war cause the genocide And what insights can a political economy perspective offer Based on more than ten years of research and engaging with competing and complementary arguments of authors such as Peter Uvin Alison Des Forges Scott Strauss Ren Lemarchand Filip Reyntjens Mahmood Mamdani and Andr Guichaoua the

author blends economics politics and agrarian studies to provide a new way of understanding the nexus between development and genocide in Rwanda Students and practitioners of development as well as everyone interested in the causes of violent conflict and genocide in Africa and around the world will find this book compelling to read **The Bounds of Liberalism** Neville Brown, 2014 Addresses such issues as climate change and resource depletion community decay data saturation the future of universities democratic devolution leaders and led and medical philosophy and biowarfare the management of Near Space international currency and a planetary ethos **Managing Risk in Agriculture** Ashok K. Mishra, Subal C. Kumbhakar, Gudbrand Lien, 2023-10-02 The book addresses and documents farmers risks in developing and emerging economies It draws lessons from experimental economics on measuring risk preferences attitudes gender differences in managing risks and risk management strategies in countries across Africa and Asia It argues policy makers especially in emerging economies need a better understanding of farmers attitudes toward risk and choices of risk management strategies when designing policies to support production agriculture The book includes chapters on three themes understanding risk attitudes and preferences using experimental economics to measure risk preferences and risk management strategies and understanding climate change risk and risk management The book critically examines the currently held beliefs about risk preference attitudes and empirical estimation of risk management strategies emphasizing developing and emerging economies DEE This book is ideal for students and researchers in universities and research organizations who conduct applied research on public policy community development and rural development and will also be of interest to policy makers in those fields **Analisi e valutazione di un modello sperimentale di orientamento al lavoro.
