

THE FIRST AMERICANS

At the height of the Ice Age, between 34,000 and 30,000 B.C., much of the world's water was locked up in vast continental ice sheets. As a result, the Bering Sea was hundreds of meters below its current level, and a land bridge, known as Beringia, emerged between Asia and North America. At its peak, Beringia is thought to have been some 1,500 kilometers wide. A moist and treeless tundra, it was covered with grasses and plant life, attracting the large animals that early humans hunted for their survival.

The first people to reach North America almost certainly did so without knowing they had crossed into a new continent. They would have been following game, as their ancestors had for thousands of years, along the Siberian coast and then across the land bridge.

Once in Alaska, it would take these first North Americans thousands of years more to work their way through the openings in great glaciers south to what is now the United States. Evidence of early life in North America continues to be found. Little of it, however, can be reliably dated before 12,000 B.C.; a recent discovery of a hunting lookout in northern Alaska, for example, may date from almost that time. So too may the finely crafted spear points and items found near Clovis, New Mexico.

Similar artifacts have been found at sites throughout North and South America, indicating that life was probably already well established in much of the Western Hemisphere by some time prior to 10,000 B.C.

Around that time the mammoth began to die out and the bison took its place as a principal source of food and hides for these early North Americans. Over time, as more and more species of large game vanished — whether from overhunting or natural causes — plants, berries, and seeds became an increasingly important part of the early American diet. Gradually, foraging and the first attempts at primitive agriculture appeared. Native Americans in what is now central Mexico led the way, cultivating corn, squash, and beans, perhaps as early as 8,000 B.C. Slowly, this knowledge spread northward.

By 3,000 B.C., a primitive type of corn was being grown in the river valleys of New Mexico and Arizona. Then the first signs of irrigation began to appear, and, by 300 B.C., signs of early village life.

By the first centuries A.D., the Hohokam were living in settlements near what is now Phoenix, Arizona, where they built ball courts and pyramid-like mounds reminiscent of those found in Mexico, as well as a canal and irrigation system.

Directions: Read the text above, then answer the questions below.

1. What is the name of the land bridge which emerged between Asia and North America during the last ice age?
2. Why did the first people cross into North America from Asia?
3. According to archaeological artifacts, how long have human beings lived in the Western Hemisphere?
4. What animals were hunted by the earliest Americans?
5. How early was corn planted in what is now Arizona?
6. Describe life for the Hohokam of present-day Arizona.

Was the American Revolution a Mistake? Burton Weltman,2013-08-27 Why was George Washington dismayed by the outcome of the American Revolution Would slavery still exist if the South had not seceded from the Union in 1861 Might socialists rule America today if Teddy Roosevelt had not run for President and lost in 1912 History is full of contingencies People confront problems and debate options for solving them Then they make a choice and face the consequences of their choice Often they wonder if a different choice might have been

better Was the American Revolution a mistake Was racial segregation inevitable Was the Cold War necessary Americans have repeatedly asked these sorts of questions as they examined the consequences of their choices This is a book about revisiting crucial choices people made in history and examining the consequences of those choices for them and for us It demonstrates a method of teaching history that recreates events as people experienced them and asks important questions that troubled them but that rarely appear in conventional textbooks Unlike conventional methods that often reduce history to names dates and factoids for students to memorize it is a method that brings past debates to life the losers as well as the winners points of view and makes the subject exciting In studying history as choice students examine the problems people faced their options for solving them their decision making processes and the choices they made Then students evaluate the consequences of those choices both for people in the past and us today They explore what might have happened if different choices had been made Finally students relate the consequences of those past choices to problems we face today and the choices we need to make History as choice is a practical and practicable method It has been designed to satisfy the curriculum goals of the National Council for the Social Studies and the book explains how it can be used to satisfy any state or local curriculum standards The book also identifies and illustrates resources that can be used with this method from data bases to popular music and explains how teachers can gradually integrate it into their courses In the first part of the book the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point The second part of the book explores thirteen other questions about significant issues and events in American history as additional examples of how one might teach history as choice
