The Ariadne Connection Sara Stamey, 2015-02-19 A near future thriller set in the Greek islands Can Saint Ariadne Demodakis connect to mythic forces to reset the world balance threatened by plague and geomagnetic reversal Reports from the Court of Claims Submitted to the House of Representatives United States. Court of Claims, 1858 **Ariadne's Lives** Nina daVinci Nichols, 1995 Indeed relatively little work has been done on the Cretan myth cycle as a whole a mixture of heroic Greek legend and savage pre Greek elements generally considered to be antithetical to evolved literary languages As a result although Ariadne has been extremely important in Western art from the time of ancient Greece through the nineteenth century she is rarely included in studies of Greek myth **The Connected Past** Tom Brughmans, Anna Collar, Fiona Susan Coward, 2016 One of the most exciting recent developments in archaeology and history has been the adoption of new perspectives which see human societies in the past as in the present as made up of networks of interlinked individuals This view of people as always connected through physical and conceptual networks along which resources information and disease flow requires archaeologists and historians to use new methods to understand how these networks form function and change over time The Connected Past provides a constructive methodological and theoretical critique of the growth in research applying network perspectives in archaeology and history and considers the unique challenges presented by datasets in these disciplines including the fragmentary and material nature of such data and the functioning and change of social processes over long timespans An international and multidisciplinary range of scholars debate both the rationale and practicalities of applying network methodologies addressing the merits and drawbacks of specific techniques of analysis for a range of datasets and research questions and demonstrating their approaches with concrete case studies and detailed illustrations As well as revealing the valuable contributions archaeologists and historians can make to network science the volume represents a crucial step towards the development of best practice in the field especially in exploring the interactions between social and material elements of networks and long term network evolution **Reports of Committees of the House of Representatives and Court of Claims** United States.
