Project-Based Learning Applied to the Language Classroom Juliana Franco Tavares/ Louise Emma Potter, 2018-03-05 In Project Based Learning Applied to the Language Classroom the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren't enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social Studies and Science However there are few published works about the specifics of PBL in foreign language classes Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough

Have you been searching for a way to resolve conflict that doesn't involve a series of ten or more steps? Do you think that perhaps a key to conflict resolution must come from within? How can teachers and pre-service teachers help their students learn and use strategies for conflict resolution? *Tools for Conflict Resolution* is a practical method for teaching conflict resolution skills to students in grades K-12. Conflict is a part of everyone's life. It is the authors' belief that if each student is given tools for handling conflict and these tools are used each time conflict arises, that soon students become proficient conflict managers. This book begins with a chapter which introduces Peter Senge's five disciplines: Personal Mastery, Mental Models, Shared Vision, Team Building, and Systems Thinking. After reading this chapter, the reader is able to embrace the five disciplines and begin practicing the adult level. As teachers, we teach from who we are. The rest of the book is filled with actual lesson plans which are directly tied to the Multiple Intelligences Theory and are developmentally appropriate for students. Case studies, role plays, skits, literature, songs, and cooperative learning activities are the primary instructional methods used to teach students conflict resolution skills. An annotated bibliography is included to assist teachers in extending lessons. These lessons may be taught during Social Studies as a unit on character education or could be used during a guidance class.
