The sign of a smart decision about information systems isn't based on technical details alone; it's based on how well that decision contributes to the overall success of the business. If you want to make your firm's investment in IS really pay off, you need to approach IS from a truly managerial perspective. The Manager's Guide to Making Decisions About IS first focuses on big picture issues such as hardware, software and the Internet, strategic uses of IS, aligning IS with the business types of applications and inter-organizational systems. Make decisions on big ticket applications. Gray then provides you with essential knowledge that will help you make informed decisions on big ticket applications including electronic commerce, enterprise requirements planning, ERP, customer relationship management, CRM, data warehousing, knowledge management and business intelligence. Explore current IS issues.
